TECHNICAL SPECIFICATIONS COMPLIANCE

(A) Computer/Peripherals and Equipment's

NOTE:

The Bidder shall submit only one proposal that meets the specification of this tender document, indicating clearly the make and model of each item of equipment being offered. Other product or alternative offer shall not be accepted or considered for evaluation. In respect of different items of equipment required for the system, only the offered item of each type of equipment shall be submitted in the technical bid. Any Bidder who submits complete range of models for each individual item of equipment or offers multiple

alternatives as a choice for individual item without clearly indicating the model that is actually offered for this work, shall have his tender out-rightly **rejected without any correspondence.**

- i) For stating **compliance**: Write “C” in the third column below.
- ii) For stating **Non-compliance**: Write “NC” in the third column below.
- iii) For stating **Partial compliance** or **conditional compliance**: Write “PC” in the third column below.
- iv) Against each compliance statement, write specific Para and page of supporting technical documentation (from which the stated compliance could be verified in fourth column below).

Specifications of the equipment better than those mentioned below shall be accepted.

The specifications detailed hereunder are the minimum requirements. Bidders may offer System/Equipment/Accessories/Software of better specifications as per system design proposed by the bidder. However, no preference or weightage shall be given to bidder for offering such System/Equipment/Accessories/Software of specifications higher than the tender specification.

Sl. No.	Requirement	Statement of compliance
1.	General Requirement:	
1.1.	The equipment shall be compact, fully solid state, highly reliable and shall use latest state of the art technology.	
1.2.	The system has to be designed to operate for 24 hours per day, 365 days in a year.	
1.3.	Hot standby arrangement should be provided for Control Circuits, Servers, Network components, storage, UPS power etc.	
1.4.	The design and selection of equipment shall be consistent with the requirements of long term trouble free operation with highest degree of reliability and maintainability.	
1.5.	All equipment shall be continuously operate safely without undue heating, vibration, wear, corrosion, electromagnetic interference or any similar problems.	
1.6.	The system shall be designed for continuous operation. The design life of the equipment shall be a minimum of Five years.	
1.7.	This life shall be achievable through normal and regular maintenance and without major dismantling or overhauling, etc.	

Signature of Bidder

1.8.	All types of spares and spare modules shall be made available by the bidder during life time of the equipment for maintenance, repair and up keep of the equipment.	
1.9.	The OEM shall undertake and ensure implementation of its offered solution and shall keep in view safety and protection of personnel during normal operation and maintenance.	
1.10.	Safety and protection of personnel during normal operation and maintenance or during malfunctioning of any equipment shall be ensured as an integrated feature of design, manufacture and installation. Adequate protection shall be included for ensuring safety of personnel from any possible hazards, including EMI radiation, high voltages, etc. The bidder shall furnish the details of EMI and Safety Standards met by offered equipment's and built in safety features.	
1.11.	The equipment shall be constructed on a modular basis, using plug-in type units and components to the extent possible. Parts subject to failure, wear, corrosion or other deteriorations or requiring occasional inspection, adjustment or replacement shall be made accessible and capable of convenient inspection and removal. All plug in units and modules shall fit on slide rails and shall be removable from front of cabinet. Connectors shall be provided with keys to prevent insertion so furnishing the wrong way or into a wrong slot.	
1.12.	Input/output termination cables shall be properly labeled to permit ready identification of the incoming/ outgoing wiring.	
1.13.	All interconnecting cables shall also be appropriately labeled to facilitate convenient interconnection and minimize chances of incorrect connection.	
1.14.	All interconnecting cables required to inter connect the equipment shall be supplied. All cables shall be fully assembled, connector pre- terminated and factory tested at the time of supply as part of overall system check.	
1.15.	The contractor shall furnish all equipment, parts, materials, cables, conduits and any other supplies required, to satisfactorily effect the complete installation of the proposed system in a professional manner.	
1.16.	The work herein specified shall be performed by fully competent workmen in a thorough professional manner. All materials furnished by the contractor shall be new, and shall conform to applicable Indian standards or any international standard.	
1.17.	All equipment except portable equipment shall be held firmly in place except to the extent that proper performance criterion dictates the use of a resilient shock absorbing mounting. All fastening and supports shall be adequate to support their loads. All switches, connectors, outlets etc. shall be clearly, logically and permanently marked. Adhesive Tape Markers and screen printed Markers liable to erasure during use will not be acceptable.	

Signature of Bidder

1.18.	The contractor must take such precautions as are necessary to guard against electromagnetic and electrostatic interference, to provide adequate ventilation, and to install the equipment to ensure maximum safety to the operators and other personnel in the area.	
1.19.	Care shall be taken in wiring so as to avoid damage to cables and equipment all joint and connections shall be made with resin cored solder or with suitable connectors. All wiring shall conform to the code of practice for electrical wiring/installations.	
1.20.	The contractor has to ensure that while installation of the system, the ICD operation is not disrupted.	
1.21.	All cables shall be marked and colour-coded for easy recognition. Proper cable ends or plugs/sockets/multi-pin connectors shall be used for ending of each cable. Cable ends & terminating points shall be marked in such a way that it can be connected without referring to the Technical Manual every time.	
1.22.	Cost of connectors and other accessories required for completion of work is deemed to be included in the quoted prices.	
1.23.	While designing the system, particular attention should be given to the maintenance part. Mechanical designs shall be such that all the inside components of different units of the system are clearly visible & easily approachable for the purpose of testing & servicing the units. Modular concept using Plug-in type of modules shall be used. Wires used for interconnecting these PCBs shall be neatly bunched and routed. These wires shall be connected to the PCBs through multi-pin, plug-in type of connectors to facilitate easy removal of PCBs for servicing.	
1.24.	Test points are to be provided & marked at all the required points in the equipment units. Voltages/data flow chart etc. shall be given in the technical manual.	
1.25.	RELIABILITY, AVAILABILITY, MAINTAINABILITY	
a)	The equipment design shall employ the most suitable engineering techniques, materials and components and rigorous inspection during manufacturing to ensure a very high MTBF (Mean Time between Failures) of equipment. The statistical estimated MTBF figures shall be indicated and supported by calculation.	
b)	All systems to be provided shall be designed and constructed to operate continuously between scheduled maintenance shutdowns for the Operational Lifetime.	
c)	Bidders shall describe the methodology, techniques and processes used to conduct the Reliability, Maintainability, and Availability (RMA) analysis. Maintainability is expressed as a probability that a system shall be restored to a specified condition within a given period of time when the maintenance is performed in accordance with prescribed procedures and resources.	

Signature of Bidder

	The Mean Time to Restore (MTTR) the equipment specified herein shall not exceed 40 minutes except in case of Computer/Peripherals Equipment Availability is the probability expressed as a percentage, that a system, under the combined aspects of its reliability, maintain ability and maintenance support, shall perform its required function at random point in time.	
e)	The bidder shall provide the figures of operational availability and reliability for the system.	
f)	The bidder shall also provide all availability and reliability figures for each sub-system proposed under this project.

Additional Conditions of Contract

1. Correction of arithmetic errors.-

Provided that Financial Bid is substantially responsive, the Procuring Entity will correct arithmetical errors during evaluation of Financial Bids on the following basis, namely: -

- (a) if there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected, unless in the opinion of the Procuring Entity there is an obvious misplacement of the decimal point in the unit price, in which case the total price as quoted shall govern and the unit price shall be corrected;
- (b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
- (c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to (a) and (b) above.

If the Bidder that submitted the lowest evaluated Bid does not accept the correction of errors, its Bid shall be disqualified and its Bid Security shall be forfeited or its Bid Securing Declaration shall be executed.

2. Procuring Entity's Right to vary Quantities.-

- (a) At the time of award of contract, the quantity of Goods, works or service originally specified in the Bidding Document may be increased or decreased by a specified percentage, but such increase or decrease shall not exceed twenty percent, of the quantity specified in the Bidding Document. It shall be without any change in the unit prices or other terms and conditions of the Bid and the conditions of contract.
- (b) If the procuring Entity does not procure any subject matter of procurement or procures less than the quantity specified in the Bidding Document due to change in circumstances, the Bidder shall not be entitled for any claim or compensation except otherwise provided in the Conditions of Contract.
- (c) In case of procurement of Goods or services, additional quantity may be procured by placing a repeat order on the rates and conditions of the original order. However, the additional quantity shall not more than 25% of the value of Goods of the original contract and shall be within one month from the date of expiry of last supply. If the suppliers fails to do so, the Procuring Entity shall be free to arrange for the balance supply by limited bidding or otherwise and the extra cost incurred shall be recovered from the Supplier.

3. Dividing quantities among more than one bidder at the time of award.-

As a general rule all the quantities of the subject matter of procurement shall be procured from the bidder, whose Bid is accepted. However, when it is considered that the quantity of the subject matter of procurement to be procured is very large and it may not be in the capacity of the Bidder, whose Bid is accepted, to deliver the entire quantity or when it is considered that the subject matter of procurement to be procured is of critical and vital nature, then in such cases, the quantity may be divided between the Bidders, whose Bid is accepted and the second lowest Bidder or even more bidders in that order, in a fair, transparent and equitable manner at the rates of the Bidder, whose Bid is accepted.
