Minutes of CLC meeting held on 26.08.17 at Pratappgarh for sewerage Project Pratappgarh under RUIDP phase-IV

A City Level Committee (CLC) meeting was held under the chairmanship of District Collector Pratappgarh on 26.08.2017 to discuss the sewerage project proposed under RUIDP phase-IV. List of members/officers attended the meeting is at Annex-A.

RUIDP Personnel informed that the sewerage project DPR which was prepared by the Consultant M/s Creative computers Jaipur engaged by the Municipal Council Pratappgarh is considered by RUIDP for Phase-IV project. RUIDP apprised the DPR and suggestions were given to the engaged consultant. Consultant has submitted modified DPR along with revised estimate as per RUIDP SCR- 2017.

The scope of work was briefed to the committee. It was informed that the DPR prepared is for capital cost of work proposed & 10 year O&M cost. The capital cost part execution is to be done by RUIDP for which funds are to be made available by Government through ADB under phase-IV. The O&M cost is to be borne by the Municipal Council as per actual basis along with power charges. The scope under project to provide sewer network of about 105 Km length, one STP for 9 MLD (round off 8.68 MLD) & one sewage pumping station near Govt. secondary school in ward no.19 to pump sewage of low laying area to main sewer. It was informed that STP is proposed on latest Sequential Batch Reactor (SBR) technology to meet out the latest effluent parameters & treated water will be used by Nagar Parishad at his own level such as irrigation, gardening and industrial etc. Property house sewer connections are included and approx 45% area of Pratappgarh city is covered in this project. The O&M payment will be on performance based under the contract. To reduce inconvenience to public deeper depth (3.5 mtr above) & crossing of NH & circles where traffic is much, trenchless technology for laying of sewer is proposed.

For sewer pipes the matter was discussed considering PHED experience of water line work. It was informed that strata in Pratappgarh is varying from mostly is rocky, therefore it was proposed that HDPE pipe should be considered in place of DWC pipe which may be damaged during laying in rocky strata & got punctured from outside.

Chairman Municipal Council was of the view that project will also put up in their board meeting in 1st week of September-17. The total estimated cost of project is Rs. 159.57 cr (works cost Rs. 145.50 crore + 10 yr O&M cost Rs. 14.12 cr). It was also deliberated that for public complaint redressal, provision of toll free number along with set up of a control room should be taken in the provision. The project was agreed by the committee for further course of action by RUIDP level.

Meeting ended with vote of thanks to the chair.

Temporary livelihood impact was anticipated on movable/transitory businesses during impact assessment and draft RP was prepared by ADB. It was suggested by ADB that transect walk data/analysis will be updated road wise after finalization of detailed design, before start of civil works. A 100% census and inventory of loss surveys will be undertaken after finalization of detailed design to register and document the status of all affected persons (APs) within sub-project impact areas and resettlement plan will be updated based on involuntary impacts identified during the census survey exercise.

It was deliberated that RP implementation is part of this loan obligation and loan covenants. It is the responsibility of CMSC to update draft RP after incorporating final impacts and budget. Contractor will facilitate Social Safeguard Person of CMSC for conducting detailed socio economic survey. Being a Design Build Operate contract, the final design/alignment will be provided/ re-confirmed by the contractor. It was also informed that (i) The work should be executed in planned/ phased manner so that temporary inconvenience is avoided (ii) Access to the households to be maintained during laying of pipeline.(iii) Access to CPRs to be maintained. (iv) Natural Drains should not be disturbed (as far as possible) (v) Advance intimation needs to be provided to the household prior to start of pipe laying works.

TREATED WATER REUSE PLAN

After commissioning, on an average 3.5 to 4.5 MLD of sewer is treated and made available for reuse at effluent storage reservoir (TESR) of 350 KL and Treated Effluent Elevated Reservoir (TEER) 700 KL within hammy limits of STP.

As per IEEE plan

"It is proposed to reuse the treated effluent for use of agriculture, horticulture, development of urban forestry etc. and remaining treated effluent is proposed to be discharged in to a nearby river Anzava.

Treated effluent shall be mostly reused for beneficial purposes for which proposal of construction of Treated Effluent Elevated Reservoir (TEER), Treated Effluent Storage Reservoir (TESR) and Effluent Pumping Station (EPS) has been taken.

"Excess or unused treated effluent will be discharged into the adjacent river Anzava behind the STP at approx. distance of 600 metre. This river is seasonal river and no significant flow and flow is reported from this river. Only in monsoon, run off water flows in this river in rest of the time only untreated sewage from the city is discharged into it at several points. Agricultural activities are noticed in the surrounding areas adjoining the river about 4.5 km from the proposed STP disposal point on the Anzava river a check dam has been constructed near Bhawan Senia."

Current reuse plan is as follows:

SN	Treated water	Reuse plan	Ratio
1	3.5 MLD	0.7 MLD - Storage in ESR for local farmers and nearby garden.	20 % FIXED
2		0.3 to 0.5 MLD - Inhouse horticulture and gardening, Plant maintenance and internal toilets.	8.5% to 14.2 % VARYING as per season.
3		0.3 to 0.5 MLD- Local firefighting.	8.5% to 14.2 % VARYING as per Usage.
4		1.8 to 2.2 MLD - Excess treated discharged to disposal point for agricultural activities downstream.	51.42 % to 62.85% VARYING and available for suitable demand.
