RIPP-Abu Road RP - FINAL 21 MAY 21 - Clean rev.doc

Dear Mr. Mandawaria, We have no objection to the attached version of RIPP Abu Road. However, please wait for Joanna to run IRIS and undertake minor formatting before proceeding with disclosure.

Dear Joanna, Please do the needful and disclose the document on ADB website. Please send the Word document (post minor formatting and running IRIS) to Mr. Mandawaria, followed by the disclosed document link.

Dear Gladys, Please update the tracking sheet for RSTDSP.

Thanks and regards,

Saswati

Dear Saswati,

The document is well received and noted. I will send the Word document to Mr. Mandawaria followed by the disclosed link once the document is uploaded in the ADB's website.

Thank you.

Regards,

Joanna

EXECUTIVE SUMMARY

Background. Rajasthan Secondary Towns Development Sector Project (RSTDSP), is the fourth phase of investment projects financed by Asian Development Bank (ADB) and implemented by the Rajasthan Urban Drinking Water Sewerage and Infrastructure Corporation Limited-Externally Aided Projects (RUDSICO-EAP), previously known as Rajasthan Urban Infrastructure Development Project (RUIDP). RSTDSP will support the ongoing efforts of the Government of Rajasthan (the government) towards improving the water and wastewater services in about 14 towns each with population between (50,000 and 100,000, in the state) or which are district headquarters (irrespective of population) or having heritage, cultural or other importance and irrespective of population. The project will invest in (i) the rehabilitation and expansion of water supply network through a district metering approach for management of nonrevenue water (NRW) and aiming for 24x7 water supply, (ii) the rehabilitation and expansion of sewerage network, (iii) modernization and new construction of water supply and waste water treatment plants, as required, (iv) construction of faecal sludge management treatment plant and procurement of desludging vehicles for Faecal Sludge and Septage Management (FSSM) (v) decentralized waste water management systems in the project towns. The project also aims for wastewater reuse and a city-wide, inclusive sanitation approach to improve sanitation for all, including below poverty line households. The project is expected to increase operational efficiency, improve service delivery, and result in positive impact on health and quality of life for the residents of project towns in the state.

Subproject Description: Abu Road is one of the towns selected under (RSTDSP) and key subproject components after Service Improvement Plan (SIP) include: **sewerage:** (i) construction of one sewage treatment plant (STP) - 6.9 MLD near cremation building at Santhpur, another one of 2.30 MLD at Manpur (ii) sewer pipe laying for collection system for a total of 105 km of 200 mm dia to 800 mm dia (iii) House Service Connection-13,000. Key **water supply** components are: (i) intake well cum raw water pump house at Bhaisa Singh Dam;(ii) construction of water treatment plant (WTP) of 10 MLD capacity at Santhpur; (iii) construction of 18 new tube wells/open wells; (iv) construction of 5 clear water reservoir(CWR); (v) transmission network of 46.44 km with pipe dia from 75 mm to 400 mm (vi) distribution network of 130 km (pipe dia ranges from 75 mm to 315 mm), (vii) Rehabilitation of existing CWRs, WTPs, Pump Houses, overhead service reservoir(OHSRs), raw water reservoir (RWRs) and staff quarters, 13 tube wells and 11 open wells (viii) provision of house service connections with consumer meters-12,800.(ix) Consumer Relation Management Centre (CRMC),Master Control Centre (MCC) and Central Control Centre (CCC).

Scope of Land Acquisition and Resettlement: No involuntary acquisition of private land is anticipated for this subproject. During initial design, land allotted for 2 STPs and 1 WTP were government lands. WTP was proposed behind ITI college, Santpur which was classified as pasture land, while STP of 6.9 MLD was proposed near cremation building at Santpur and land for STP-2.30 MLD at Manpur is completely vacant and unused land of Municipality. Due to delay in land conversion, it was decided by District Collector and representatives of PIU and urban local body (ULB) to allot 15,694 m² of land (pasture land) under khasra no.272 for construction of 1 STP (6.9 MLD) and WTP (10 MLD). This vacant land parcel of 15,694 m² was already allotted to Municipality (in 2004) for solid waste disposal by District Collector will now be utilized for construction of STP and WTP under this project and suitable land will be sourced for solid waste disposal. During preliminary design, 5 numbers of clear water reservoirs (CWRs) were proposed in the unused land within existing public health engineering department (PHED) campus. During confirmatory survey, location of two CWR has been changed and new location identified in the village Kue (land belongs to Urban Improvement Trust - UIT) and assistant

engineer (A. En) PHED campus at housing board. Additional land adjacent to PHED campus, Market area has been allotted by Municipality to PHED for the construction of CWR and Pump house. Tube wells will be constructed in vacant government land with no encumbrances. The location of Consumer Relation Management Center (CRMC) and Central Control Centre (CCC) has also been changed during confirmatory survey and new location finalized in the Shantikunj Park. Sufficient vacant/unused land is available in the park for the construction of CRMC. The land is under the possession of Municipality.

Pipelines of sewer and water supply network are proposed within the existing available right of way (RoW) of government roads and no loss of structure, common property resources (CPRs) or relocation impact is envisaged. All proposed RoW of roads for laying pipelines are owned by government departments. However, transect walk and public consultations suggest that execution of pipeline work may cause temporary loss of livelihood/income due to access disruptions to 435 roadside permanent shops and mobile vendors. Based on data from the socio-economic survey, estimated 56% of the affected persons belong to vulnerable category. This Resettlement and Indigenous Peoples Plan (RIPP) is being updated to reflect the change in land parcels and to reflect the findings of the confirmatory and socio-economic survey.

Impact on indigenous peoples: Abu Road Tehsil (sub-district) which includes Abu Road Town has been declared as a scheduled area by the Government of India. Whilst many Scheduled Tribe (ST) households residing here; no longer maintain their cultural traditions and have settled amongst the non-tribal populations. The subproject area is Abu Road Town which has 10.59% (Census 2011) of scheduled tribe population. The subproject is expected to have beneficial impacts on scheduled tribe community in Abu Road Town- 100% of the scheduled tribe community in coverage areas will be provided with water supply connections. Additionally, bulk water supply connections (allied work will be taken up by Public Health Engineering Department) will be provided in 6 villages, also in scheduled area (of which 03 villages have more than 70% of scheduled tribe population) which are located along the alignment of the transmission main.

Consultation and Disclosure: Goals and objectives of the project have been disclosed to stakeholders (including beneficiaries, affected persons, scheduled tribe community, elected representatives and institutional stakeholders) during preparation of detailed project report and updating of this RIPP. Stakeholders have been briefed about the technical details of the project and project implementation cycle; project benefits as well as adverse impacts envisaged; environmental and social safeguards, gender inclusion, community participation built into the project. Full documents will be uploaded at PMU/PIU and ADB websites. Pipe laying work or work related to other components are not proposed or envisaged within rural settlements. Primary outlet (bulk water supply connection) will be provided at an inlet point to the village/s. Consultation carried-out during preparation of the safeguard documents did not reveal culture/tradition specific requirements. Consultation with stakeholders and ST communities shall be continued throughout the project cycle.

Grievance Redress Mechanism: GRM has been established under this sub-project. The GRM will aim to provide a time-bound and transparent mechanism to voice and resolve social and environmental concerns linked to the Project. Office order of PMU also issued to all PIUs/CMSC to follow that grievance mechanism.

Resettlement and Indigenous Peoples Plan Budget and Financing Plan: The total budget¹ for this resettlement and indigenous peoples plan for the subproject is estimated as ₹ 6,099,476. PIU will issue order for release of payment to affected persons and transfer funds electronically. Community awareness and public participation (CAPP) consultant will be involved in facilitating the disbursement process and opening bank accounts for the affected persons who do not have such accounts.

Institutional Setup: The Local Self Government Department (LSGD), Government of Rajasthan (GOR) is the executing agency (EA) of the Project and LSGD is responsible for overall strategic approvals, guidance, and monitoring of the project. Rajasthan Urban Drinking Water Sewerage and Infrastructure Corporation Limited (RUDSICO) is the Implementing Agency (IA) for the project. The Project Management Unit (PMU) is housed in the Externally Aided Projects division of RUDSICO (RUDSICO – EAP). Resettlement plan implementation (RIPP in this case) is being closely monitored by PIU/PMU. Monitoring reports prepared by PIU will be compiled by PMU on a semi-annual basis for its due submissions to ADB.

¹ Alignment yet to be finalized, survey undertaken on both sides of the road and accordingly budget has been calculated.

I. INTRODUCTION

A. Subproject Description

1. Rajasthan Secondary Towns Development Sector Project (RSTDSP), is the fourth phase of investment projects financed by Asian Development Bank (ADB) and implemented by the Rajasthan Urban Drinking Water Sewerage and Infrastructure Corporation Limited-Externally Aided Projects (RUDSICO-EAP), previously known as Rajasthan Urban Infrastructure Development Project (RUIDP). RSTDSP will support the ongoing efforts of the Government of Rajasthan (the government) towards improving the water and wastewater services in about 14 towns² each with population between (50,000 and 100,000, in the state) or which are district headquarters (irrespective of population) or having heritage, cultural or other importance and irrespective of population. The project will invest in (i) the rehabilitation and expansion of water supply network through a district metering approach for management of nonrevenue water (NRW) and aiming for 24x7 water supply, (ii) the rehabilitation and expansion of sewerage network, (iii) modernization and new construction of water supply and waste water treatment plants, as required, (iv) construction of faecal sludge management treatment plant and procurement of desludging vehicles for Faecal Sludge and Septage Management (FSSM) (v) decentralized waste water management systems in the project towns. The project also aims for wastewater reuse and a city-wide, inclusive sanitation approach to improve sanitation for all, including below poverty line households. The project is expected to increase operational efficiency, improve service delivery, and result in positive impact on health and quality of life for the residents of project towns in the state.

2. Abu Road is the Tehsil Headquarter of Sirohi District. It is located at 24°48' N latitude and 72° 78' E longitude on the banks of river Banas. It has an average elevation of 263 m from mean sea level. Total area of Abu Road Town is 1289 hectares comprising of 31 wards. Mount Abu, the only Hill station of Rajasthan is 27 km away from Abu Road.

3. Abu Road city is governed by City Council (Nagar Palika) which falls under Abu Road Urban Agglomeration. It is surrounded by Pali in the north, Jalore in the west, Udaipur and Rajsamand in the east and Gujarat to the south. According to Census 2011, Abu Road had a population of 55,599. Males constitute 53% of the population and females 47%. Abu Road has an average literacy rate of 80.81%, higher than the state average of 66.11%. About 89.63% of the males and 70.97% of females are literate. About 11.89% of the population is under 6 years of age.

4. At present, no functional sewerage system exists in Abu Road. Wastewater from kitchens and bathrooms is discharged into storm water drains culminating finally to the drains or on ground, which pollutes the environment and contaminates the ground water. Open defecation is not uncommon. Most of the residential and commercial buildings and educational institutions have on-site septic tanks and soak pits. Though septic tank is an accepted onsite treatment, however the existing septic tanks are not designed and maintained properly. The effluent does not conform to the norms/standards and is directly let into the open drains. Water supply service in Abu Road is unreliable, coupled with quality issues and huge distribution losses.

² The project towns under consideration for the sector loan are: Abu Road, Banswara, Didwana, Fatehpur, Khetri, Kuchaman, Ladnu, Laxmangarh, Makrana, Mandawa, Pratapgarh, Ratangarh, Sardarshahar and Sirohi. Of these towns, Khetri and Mandawa are heritage towns.

5. The Contract of Abu Road Water supply and Sewerage subproject has been awarded on dated 18 June 2020 and confirmatory survey works started from the same date.³ During confirmatory survey, location of Water treatment plant (WTP), Consumer Relation Management Center (CRMC), Central Control Centre (CCC) and Clear Water Reservoirs (CWRs) and pump house has been changed as per technical requirements. (**Ref Table 1 for details of changed locations**). New locations which has been finalized for all the said components are vacant government land and presently not in any use. Initially 10 MLD WTP was proposed behind ITI College, Santpur which was pasture land. Due to delay in process of land conversion of previously identified WTP land, meeting of PIU was held with District Collector and officials of urban local body (ULB). It was decided in the said meeting that the land parcel (allotted to Municipality) erstwhile designated for solid waste disposal be allotted for construction of WTP (10 MLD) and STP-6.9 MLD. Location of CWR at Gandhi Nagar has been changed and new location has been identified in the village Kue. In addition to that CWR of 500 kL proposed earlier at PHED campus at housing board will be constructed in the vacant and unused land in the assistant engineer(A.En) PHED office campus in housing board. Additional land adjacent to PHED campus, Market area has been allotted by Municipality to PHED for the construction of CWR and Pump house. The location of Consumer Relation Management Center (CRMC) and Central Control Centre(CCC) has been changed and new location finalized in the Shantikunj Park.

Table 1: Components and its location

S. No	Components	Previous location	New location
1	WTP at Santhpur (10 MLD)	Behind ITI College	Near cremation building, Santpur
2	CWR at Gandhi Nagar	Existing PHED campus, Gandhi Nagar	village Kue
3	CWR of 500 kL proposed earlier at PHED campus at housing board	PHED campus at housing board	A. En PHED campus, Housing Board
4	CWR at Market Area	PHED campus, Market Area	Adjacent land belongs to Municipality also allotted to PHED for the said works.
5	Consumer Relation Management Center (CRMC) and Central Control Centre	CRMC/CCC/MCC was proposed within the existing PHED campus at Housing Board	Shantikunj Park

Source: Monthly progress report of Contractor, December 2020

B. Proposed Subproject Components

6. Abu Road is one of the towns selected under (RSTDSP) and subproject components after service improvement plan (SIP) include **sewerage**: (i) construction of 02 sewage treatment plants (STPs), one near cremation building, Santpur of 6.9 MLD capacity and another of 2.30 MLD capacity at Manpur (ii) Construction of Treated Effluent Elevated Reservoir (TEER) and Treated Effluent Storage Reservoir (TESR) is proposed at the same STP location of Manpur (iii) laying of sewer pipes for 105 km with pipe diameter ranging between 200 mm to 800 mm,

³ The Abu Road Water supply and sewerage subproject was proposed for implementation under the design-build-operate (DBO) modality, and as per contract, the detail design will be carried out by the selected bidder based on the feasibility/preliminary project report prepared prior to bidding.

including 14.5 km trenchless works; (iii) house service connections – 13000. **Proposed water supply components include:** (i) intake well cum raw water pump house at Bhaisa Singh Dam. The proposal includes offtake at Bhaisa Singh Dam and pumping station; (ii) construction of water treatment plant (WTP) of 10 MLD capacity near cremation building, Santpur (same campus of 6.9 MLD STP) (iii) construction of 18 new tube wells/open wells; (iv) construction of new clear water reservoirs (CWR) and pump houses of 300 kL capacity at existing PHED campus, Santpur, 850 kL at Market Area, 600 kL at village Kue, 500 kL at A.En PHED campus Housing Board and 300 kL at Luniyapura; (v) transmission system of 46.44 km of DI pipe with pipe diameter ranging from 75 mm to 400 mm; (vi) distribution network of 130 km (pipe diameter ranges from 75 mm to 315 mm) HDPE new pipe network, replacement of existing AC pipes and PVC pipes; (vii) provision of Supervisory Control and Data Acquisition (SCADA), Electrical, Mechanical and Allied Works; (viii) rehabilitation of existing CWRs, WTPs, Pump Houses, over head service reservoirs (OHSRs) / ground level service reservoir (GLSR), raw water reservoir (RWRs) and staff quarters; (ix) provision of house service connections with consumer meters-12800; (x) 1 consumer relation management centre (CRMC), 1 centre control centre (CCC) and 1 master control centre (MCC); (xi) road works (road restoration); (xii) rehabilitation of existing tube wells and open wells – 11 open wells and 13 tube wells.

7. The details regarding area and number of proposed new tube wells/open wells and rehabilitation of existing tube wells/open wells are presented in the table below. The proposed locations and layout plan

Table 2: Details of proposed new tube wells/open wells

S.No.	Name of Area	No. of tube wells / open wells proposed
1.	Near Banas river	4
2.	Near ITI College	3
3.	Near Vijaysni OHSR	4
4.	Near Aheshwar Temple	4
5.	Near Chandrawat	3
Total		18

9. As depicted in Table 6, total 105 km of sewer network is proposed with pipe diameter ranging between 200 mm to 800 mm. The existing road width where trunk main will be laid ranges between 10 m to 12 m. Total 46.44 km of water supply transmission main is proposed with pipe diameter ranging between 75 mm to 400 mm on existing roads having width ranging between 3 m to 14 m. The sewer and water supply network details are provided below.

Table 6: Summary Details of Pipeline - Water supply and Wastewater

Details of Network	km	Road Width in m	Dia of Pipe in mm
Sewer Network			
Total Sewer Network in Town	105	3-14	200-300
Total Sewer Network in Major Road-NH/SH	5.07	4.5-14	
Total Sewer Network in colony road/Internal Road	90.12	3.4-5

Source:Detailed Project Report, Abu Road, August 2019

10. Abu Road Tehsil⁴ (sub-district) is declared as 'scheduled area'⁵ by the Government of India which is duly notified by Tribal Area Development Department, Government of Rajasthan. Abu Road Tehsil. The total area (rural and urban) of the Tehsil has a considerably high percentage of scheduled tribe⁶ population (70%) according to Census 2011. The subproject area has 10.59% scheduled tribe population. Under this subproject, pipeline (transmission main) will be passing through 6 villages. Out of the 6 villages: (i) 3 villages i.e., Manpur, Kui and Umarni have more than 70% scheduled tribe population, and (ii) 1 village (Khadat) has more than 50% (iii) 1 village (Santpur) has nearly 11 % and (iv) 1 village Tartoli has about 3% scheduled tribe people. To extend the subproject benefits and honour the requests of the villagers received during consultations, treated water shall be made available for these nearby villages, having total population of 16,498 and total tribal population 5573. Primary outlet (bulk water supply connection) will be constructed/provided and remaining works will be executed under rural water supply scheme by the Public Health Engineering Department (PHED). Refer **Appendix 1** for the confirmation letter from Chief Engineer RUIDP to Chief Engineer PHED regarding provision of water supply in the 6 villages. Relevant section of the bid document (part of Appendix 1) of Abu Road also specifies that bulk water shall be provided to the 6 villages and distribution related work in the 6 villages will be taken up by PHED. The decision to provide water to the 6 villages near Abu Road Town was also taken in the CLC meeting held on 25 August 2017. The locations of the villages are marked in figure 1 below. The village names are Manpur, Tartoli, Khadat, Umarni, Kui and Santpur.

11. The layout plan of the STPs, intake, WTP and CWR and pump houses locations of tube wells along with proposed sewer and water supply networks are provided from figure 2 to 13.

⁴ For administration and development, district is divided in Sub-Divisions and Tehsils (sub-districts).

⁵ As per the Constitutional provision under Article 244 (1) of the Constitution of India, the 'scheduled areas' are defined as "such areas as the President may by order declare to be scheduled areas"- as per paragraph 6(1) of the Fifth Schedule of the Constitution. The specification of "Scheduled Areas" in relation to a State is by a notified order of the President, after consultation with the State Government concerned. The same applies in the case of any alteration, increase, decrease, incorporation of new areas, or rescinding any Orders relating to "Scheduled Areas". Criteria for declaring any area as a "Scheduled Area under the Fifth Schedule are: • Preponderance of tribal population, • Compactness and reasonable size of the area, • A viable administrative entity such as a district, block or taluk, and • Economic backwardness of the area as compared to the neighbouring areas.

Source: <https://tribal.nic.in/declarationof5thSchedule.aspx>; <https://tribal.nic.in/DivisionsFiles/clm/ScheduledAreas.pdf>

⁶ The Constitution of India defines scheduled tribes, as follows: "Scheduled tribes (scheduled tribes) are those communities notified as such by the President of India under Article 342 of the Constitution. The first notification was issued in 1950. The President considers characteristics like (i) tribes' primitive traits; (ii) distinctive culture; (iii) shyness with the public at large; (iv) geographical isolation; and (v) social and economic backwardness before notifying them as a scheduled tribe." A scheduled tribe will have one of these factors by the respective markers.

12. Measures to Avoid and Minimize Involuntary Resettlement and Indigenous Peoples Impacts: To avoid and minimize involuntary resettlement impacts, the subproject considers the use of government land where available and right-of-way of government road for laying of all proposed pipelines under this package. The pipelines are proposed to be laid underground within the existing available road RoW. Contractor will also ensure that access is provided to all households as well as shops. The Project Implementation Unit (PIU) will also ensure that all the necessary rules related to safety and security of the public and residents are followed by the contractor. The actual dates of construction schedule with respect to rush hour, festival time, and special business days will be discussed with vendors, squatters, market committee members, and residents, and accordingly construction activities will be planned. After laying pipes, the lane/road will be restored to its original condition {including bitumen, cement concrete (CC) and CC interlocking tiles as applicable}. Care is taken in the design, to ensure that indigenous peoples/ scheduled tribe community have beneficial impacts.

13. The contractor will also be required to maintain access to shops and residences or other buildings along pipe alignments and to institutions located close to proposed sites, and safety through hard barricading of excavated alignments/sites. Specific provisions related to impact avoidance, for pipe laying activities as well as construction work near schools, health centers, Anganwadi centers (Integrated Child Development Scheme-ICDS), etc will have to be maintained by the contractor.

14. Measures to be taken by the contractor to avoid/mitigate economic impacts include: (a) announcement of proposed civil works in advance (to enable shop owners to stock up and remain unaffected if goods vehicles are unable to reach them during construction), (b) provision of planks to ensure pedestrian access; (c) careful timing of implementation to avoid peak sale hours/days or school timings; (d) use of trenchless pipe laying technology, major civil work during night hours especially in market areas, (e) minimizing construction period to the extent possible; (f) assistance to mobile vendors if any present during construction, to shift nearby; (g) signage with project details and contact details for grievance redress; (h) proper coordination of civil works pertaining to both water supply and sewerage, such that the period of disruption along a particular road section is minimized; and (i) proper traffic management. If any steps or access ramps are damaged during construction, contractor will restore the same to original condition or better. These measures are part of the contract and will be implemented with careful monitoring by the concerned PIU.

C. Objectives of Resettlement and Indigenous Peoples Plan

15. Draft combined Resettlement and Indigenous Peoples Plan (RIPP) was initially prepared for the Abu Road Water supply and Sewerage subproject under RSTDSP was based on the preliminary project report prepared by RUDSICO (EAP). The document is being updated to indicate the final components of the project based on SIP, confirmatory survey and 100% socio economic surveys of potential affected persons. This subproject is based on design-build-operate (DBO) modality, where in which the detail design will be carried out by the bidder based on the feasibility/preliminary project report prepared prior to bidding.

16. Abu Road Tehsil⁷ (sub-district) is declared as 'scheduled area'⁸ by the Government of India which is duly notified by Tribal Area Development Department, Government of Rajasthan.

⁷ For administration and development, each district is divided into Sub-Divisions and Tehsils (sub-districts).

The total area (including rural and urban areas of the Tehsil) has a considerably high percentage of scheduled tribe⁹ population (70%) according to Census 2011. This subproject will be primarily implemented in Abu Road Town, located within the scheduled area, which has 10.59% of scheduled tribe population. Considering the project is being implemented in an area classified by government as a scheduled area and has a high concentration of scheduled tribe population; SPS safeguards requirement 3 pertaining to indigenous peoples is triggered. The project is designed to benefit 100% scheduled tribe households in the project coverage area. Contractual provisions will ensure that 100% scheduled tribe households in the coverage area in Abu Road Town will benefit from house service connections for water supply and from improved wastewater infrastructure. Project cost includes the cost of 100% water supply house service connections in the coverage area, including to scheduled tribe households. House service connections for sewerage are also included in project costs and will be provided to all households (including scheduled tribe households) in streets where it is technically feasible to lay pipes; the remaining households will receive improved wastewater management services through the proposed fecal sludge and septage management component. In addition to beneficial impacts to tribal population in Abu Road Town, treated water shall be made available for 6 nearby villages (also located in the same tehsil classified as scheduled area), collectively having 33.78% scheduled tribe to total population.

17. This updated RIPP is prepared in accordance with ADB SPS 2009 requirements for involuntary resettlement and indigenous peoples Category B projects and to meet the following objectives:

- (i) to ensure that the scheduled tribe receive culturally appropriate social and economic benefits;
- (ii) to ensure that when potential adverse impacts on the scheduled tribe are identified, these will be avoided to the maximum extent possible;
- (iii) to describe the identified scope and extent of land acquisition and involuntary resettlement impacts, impacts on indigenous peoples because of identified project components, and address them through appropriate recommendations and mitigation measures in the Plan;
- (iv) to present the socio-economic profile of the population in the project area including the indigenous peoples, identify social impacts, including impacts on the poor and vulnerable, and the needs and priorities of different sections of the population, including women, poor and vulnerable;
- (v) to describe the likely economic impacts and identified livelihood risks of the proposed project components;
- (vi) to describe the process undertaken during project design to engage stakeholders and the planned information disclosure measures and the process for carrying out consultation with affected people and facilitating their participation during project implementation;

⁸ criteria for declaring any area as a "Scheduled Area under the Fifth Schedule of the Indian Constitution are: preponderance of tribal population, compactness and reasonable size of the area, a viable administrative entity such as a district, block or taluk, and economic backwardness of the area as compared to the neighbouring areas. Source: <https://tribal.nic.in/declarationof5thSchedule.aspx>; <https://tribal.nic.in/DivisionsFiles/clm/ScheduledAreas.pdf>

⁹ The Constitution of India defines as scheduled tribes, as follows: "Scheduled tribes (scheduled tribes) are those communities notified as such by the President of India under Article 342 of the Constitution. The first notification was issued in 1950. The President considers characteristics like (i) tribes' primitive traits; (ii) distinctive culture; (iii) shyness with the public at large; (iv) geographical isolation; and (v) social and economic backwardness before notifying them as a scheduled tribe." A scheduled tribe will have one of these factors by the respective markers.

- (vii) to establish a framework for grievance redressal for affected persons that is appropriate to the local context, in consultation with stakeholders;
- (viii) to describe the applicable national and local legal framework for the project, and define the involuntary resettlement and indigenous peoples policy principles applicable to the project;
- (ix) to define entitlements of affected persons including persons from scheduled tribe community, and assistance and benefits available under the project;
- (x) to present a budget for resettlement and define institutional arrangements, implementation responsibilities and implementation schedule for resettlement implementation; and
- (xi) to describe the monitoring mechanism that will be used to monitor resettlement and indigenous peoples plan implementation.

II. SCOPE OF LAND ACQUISITION AND INVOLUNTARY RESETTLEMENT

A. Wastewater

18. **Construction of Sewage Treatment Plants:** Land acquisition is not envisaged for implementation of proposed subproject component. Vacant unused land near cremation building, Santpur was previously classified as pasture land, which has been allotted to Municipality (Nagar Palika) by District Collector, Sirohi as per revenue department order 6(746) & as per clause of Rajasthan Tenancy Act 1955 on dated 11.01.02, for dumping of solid waste has been allotted for construction of the 6.9 MLD STP. Revenue documents show the land has been registered in the name of Municipality upon such allotment (Khasra No.1374/272). Separate land for solid waste dumping will be sourced by the ULB. The STP of 2.30 MLD in Manpur, will be constructed in the available vacant land belonging to Municipality which is not under any productive use. Total land required for construction of (i) STP at Santhpur will be around 6,200 m² and available land at site is about 15,694 m²; (ii) STP at Manpur will need 2300 m² out of 85,556 m² of available land. Summary table on the land availability, ownership status, dimensions and photographs is attached as **Appendix 2**. No objection certificate – NOC (consent letters from Municipality) **Appendix 3 and 4**, revenue record of proposed STP sites, photographs, layout plans and Google maps are attached through **Appendix 5 to 12**.

19. The project is designed to benefit 100% scheduled tribe households in the project coverage area. House service connections for sewerage are included in project costs and will be provided to all households including scheduled tribe households in streets where it is technically feasible to lay pipes; the remaining households will receive improved wastewater management services through the proposed fecal sludge and septage management component.

B. Water Supply

20. **Construction of Water Treatment Plant (WTP), Consumer Relation Management Centre (CRMC), Centre Control Centre (CCC), Master Control Centre (MCC) and Clear Water Reservoir (CWR):** Land acquisition is not envisaged for implementation of proposed subproject components. Initially 10 MLD WTP was proposed behind ITI College, Santpur which was pasture land. Due to delay in process of land conversion of previously identified WTP land, the land near cremation building (Moksh Dham) at Santhpur is allotted for the construction of both WTP (10 MLD) and STP (6.9 MLD). District Administration already given direction to the officials of Revenue department and Municipality for searching new solid waste disposal site. Municipality already provided confirmation in this regard. Total land required for WTP is 6400 m²

and approximately 15,694 m² land is available. Summary table on the land availability, ownership status, dimensions and photographs is attached as **Appendix 2**. No objection certificate – NOC (consent letters from Municipality-**Appendix 4**), revenue record/land records of proposed WTP site (**Appendix 6**), layout map, photograph and Google map are attached in **Appendix 7 to 9**.

21. During preliminary design, 5 numbers of CWRs were proposed in the unused land within existing PHED campus. During confirmatory survey, location of two CWR which was earlier proposed at Gandhi Nagar and Housing board PHED campus has been changed and new location identified in the village Kue and A.En PHED campus. Land identified in the village Kue is vacant and unused land of Urban Improvement Trust (UIT) while CWR of 500kL proposed earlier at PHED campus at housing board will be constructed in the vacant and unused land in the A.En PHED office campus in housing board. Additional land adjacent to PHED campus, Market area is also allotted by Municipality to PHED for the construction of CWR and Pump house. The details of changed location of CWRs are presented in Table 7. Summary table on the land availability, ownership status, dimensions and photographs is attached as **Appendix 2**. No objection certificate – NOC (consent letters from UIT and PHED-**Appendix 13 to 16**), proposed sites photographs (**Appendix 18**), Layout and Google maps are attached in **Appendix 19 to 22**. Tube wells will be constructed in vacant government land with no encumbrances.

Table 7: Changed Location of CWRs

S.N.	Description	Previous Location	Changed location
1.	Proposed CWR at Santhpur (300 kL)	WTP Campus, Santpur	No Changes
2.	Proposed CWR at Market area (850 kL)	Existing PHED Campus, Housing Board	No Changes, Additional land adjacent to PHED campus also allotted by MC to PHED for the construction of CWR and Pump house.
3.	Proposed CWR at Gandhi Nagar (600 kL)	Existing PHED campus, Gandhi Nagar	Village Kue- UIT land
4.	Proposed CWR at Housing Board (500 kL)	Existing PHED campus, Housing Board	Existing A. En PHED Campus, Housing Board
5.	Proposed CWR at Luniyapur (300 kL)	Existing PHED Campus Luniyapura	No Changes

Source: SIP, 2020

22. The location of Consumer Relation Management Center (CRMC) and Central Control Centre(CCC) has also been changed during confirmatory survey and new location finalized in the Shantikunj Park. Sufficient vacant/unused land is available in the park for the construction of CRMC and CCC. The land is under the possession of Municipality. Total area of the park is approx. 16,332 m² and around 50% of that areas is being used for public. The proposed site is located in the left side of the second gate of the park which is not used by public for accessing the park. Under this subproject, landscaping works will be executed only for the areas where CRMC and CCC works are proposed. During construction of CRMC and CCC, firm barricades should be provided all around the proposed site to avoid the entrance of public during construction phase. Signboard and safety signages will be displayed at site and gate adjacent to the proposed sites will be closed for the entire construction period. The park has four gates for entrance thus closure of one gate will not have any impact regarding public access to

the park. Summary table on the land availability, ownership status, dimensions and photographs is attached as **Appendix 2** and NOC (consent letter from Municipality is attached in **Appendix 14**), revenue record of proposed site, photographs, layout, google map is attached in **Appendix 23 to 25**. Master Control Centre (MCC) will be constructed in the proposed WTP campus near cremation building (Moksh Dham) at Santhpur.

23. **Construction of Intake well and Pumping station at Bhaisa Singh Dam:** Intake well is proposed at Bhaisa Singh Dam. The proposal includes offtake at Bhaisa Singh Dam to cater to the water demand of Abu Road Town. A pumping station is also proposed at Bhaisa Singh Dam. Based on multiple site visits by multiple stakeholders it has been ascertained that no fishing activity takes place in this Dam. Construction of the intake facility would have no impact on any other activity related to livelihood of persons. Same was also confirmed with concerned Department. Salient features of Dam are attached in **Appendix 26** and the ownership transfer details (from Water Resource Department to PHED) of Bhaisa Singh Dam is placed as **Appendix 27**.

24. The project is designed to benefit 100% scheduled tribe households in the project coverage area. Contractual provisions will ensure that 100% scheduled tribe households in the coverage area in Abu Road Town will benefit from house service connections for water supply. Project cost includes the cost of 100% water supply house service connections in the coverage area, including scheduled tribe households. Treated water shall be made available for 6 nearby villages, which is anticipated to benefit 100% population including scheduled tribe population in the villages.

Table 8: Land requirement for key wastewater and water supply works – Abu Road

S.No	Description	Location	Area in m ²		Total Land Area Available (in m ²)	Ownership/ Possession
			Length (m)	Width (m)		
Sewerage (wastewater)						
1.	STP -1 (6.9 MLD)	Near cremation building (Moksh Dham) at Santhpur	6,200 m ²		15,694 m ²	Municipal Board
2.	STP -2 (2.30 MLD)	Manpur near Bridge	2,300 m ²		85,556 m ²	Revenue Department/ Municipal Board
Water Supply						
6.	Proposed WTP at Santhpur (10 MLD)	Near cremation building (Moksh Dham) at Santhpur	6,400 m ²		15,694 m ²	Municipal Board

Table 9: Key subproject components and their Involuntary Resettlement and Indigenous Peoples Impacts

S No.	Name of the Component/s	Permanent Impact on Land Acquisition and Resettlement	Temporary Impact	Remarks
1	Construction of STP (6.9 MLD) and WTP (10 MLD) at Santpur	None	None	These facilities will be constructed in the vacant land erstwhile designated for solid waste disposal near cremation building (Moksh Dham) at Santhpur. The land is currently vested with urban local body (ULB) or the Municipality and not being used for any purpose by any individual or institution or department. No involuntary resettlement /indigenous people's impacts are anticipated. NOC obtained from Municipality for the said works.
2	STP (2.3 MLD) at Manpur	None	None	The STP of 2.30 MLD in Manpur, will be constructed in the available vacant land not under any productive use by any individual or institution or department. No involuntary resettlement /indigenous people's impacts are anticipated. NOC obtained from Municipality for the said works.

S No.	Name of the Component/s	Permanent Impact on Land Acquisition and Resettlement	Temporary Impact	Remarks
3	Construction of CRMC/MCC and CCC at Santpur Head works	None	None	CRMC and CCC are proposed at the left corner of the Shantikunj Park. The land is under the possession of Municipality. Sufficient vacant land is available in the park for the construction of CRMC and CCC. MCC building will be constructed the proposed WTP campus near cremation building (Moksh Dham) at Santhpur. No involuntary resettlement /indigenous people's impacts are anticipated. NOC obtained from Municipality for the said works.
3	5 CWRs with capacity of 300 kL, 850 kL, 600 kL, 500 kL, and 300 kL capacity	None	None	Out of 5 CWRs, 2 CWR (Housing Board, Luniyapura) will be constructed on the available PHED land within the existing campus of PHED, while additional land adjacent to PHED campus market areas allotted by Municipality for the construction of CWR. CWR at Gandhi Nagar will now be constructed in UIT land in the village kue. CWR proposed earlier at Santpur will be constructed in the WTP campus. No involuntary resettlement /indigenous people impacts are anticipated. NOC of PHED/UIT and Municipality obtained for the said works.
4	Construction of Intake well and Pumping station at Bhaisa Singh Dam	None	None	No impact envisaged.
5	Bulk water supply to 6 villages	None	None	No involuntary resettlement impact envisaged. Indigenous peoples in the 6 villages will be benefited through the bulk supply.

Source: Transect walks, SIP, December 2020

25. Pipe laying works: Being Design Build and Operation (DBO) contracts, even though the DPR are being prepared by consultants, the final design/alignment has to be provided/ prepared by the project contractor. As per contract, contractor have to carry out the execution activities in all respects for that particular zones/DMA's and after completing the particular DMA/Zones, contractor shall focus for remaining zones/DMA's on priority basis. Presently the final alignment is being provided by the contractor DMA/Zone wise. As it was mandatory to prepare revised RIPP including 100% socio economic survey of potential affected persons before start of civil

work in the town, joint visit and transect walk was undertaken by the officials of PIU, CMSC in all the areas including areas / along proposed alignment where pipeline will be laid and it was confirmed that laying of trunk main-9.81km(sewer) of dia 350 mm to 800 mm and transmission main/feeder main-46.44 km (water supply) of dia 75 mm to 400 mm will be carried-out within the boundaries of RoW of government roads. The required trench width for trunk main¹⁰ vary from 2.5 m to 5 m and for transmission main/feeder main, trench width will be about 1.2 m to 1.7 m and will be laid in the road side avoiding utility line. No commercial establishments are identified in the stretches where transmission main/feeder main and trunk mains are proposed. The details of the roads proposed for laying the trunk main/ transmission main pipelines with photographs and proposed pipeline diameters are provided in **Appendix 28**.

Table 10: Details of Proposed Main Pipelines

Details of Network	Length (km)	Road Width (in meter)	Dia of Pipe	Remarks
Sewer Trunk line	9.81 km	10-12	350-800	No involuntary resettlement impact envisaged as sufficient RoW (vacant and unused) available on government roads along which pipelaying is proposed.
Water Supply Transmission /Feeder Main	46.44 km	3-14	75-400	

Source: Transect walks Dec 2020.

26. Viable construction practices will be ensured by the contractor to avoid/mitigate impacts through the following measures: (a) announcement of proposed civil works in advance (to enable shop owners to stock up and remain unaffected if goods vehicles are unable to reach them during construction, (b) provision of access planks to ensure pedestrian access; (c) careful timing of implementation to avoid peak sale hours/days or school timings; (d) night work in commercial areas, where possible; (e) minimizing construction period to the extent possible; (f) assistance to mobile vendors if any present during construction, to shift nearby; (g) signages with project details and contact details for grievance redress; and (h) proper traffic management. These measures are part of the contract and will be implemented with careful monitoring by the concerned PIU.

27. The contractor appointed will be also be required to maintain access to shops and residences or other buildings along pipe alignments and to institutions located close to proposed sites. Safety will also be ensured through hard barricading of excavated alignments/sites, in line with EMP provisions.

¹⁰ The depth of sewer line depends on natural ground terrain of the town, therefore the value given may change during execution.

Figure 14: Drawing of Sewerage Trunk main

Source: Preliminary Detailed Project Report, Abu Road, August 2019.

Figure 15: Drawing of Water Supply Transmission / Feeder Main

Source: Preliminary Detailed Project Report, Abu Road, August 2019

28. Water distribution network pipelines under water supply component will be mostly laid along the existing RoW of the town roads, while sewer lines will be laid in the middle of the roads, as a result there would be temporary livelihood disruption on mobile/ambulatory vendors who are earning their livelihood by using public land and considered non-titleholders. The diameter of pipeline ranges from 75 mm to 315 mm. Based on transect walks along the alignment it is confirmed that there will be no loss of structure, common property resources (CPRs).¹¹ or other relocation impacts during laying of pipelines. All proposed RoW of roads for laying pipelines are owned by government departments. Transect walks confirm that the impacts of the proposed subproject are temporary in nature. The majority of affected persons comprise non-titled movable /transitory structures (push carts etc.) within RoW of roads, who face temporary economic impacts during construction due to access disruption. There will be no temporary economic impacts or other impacts on permanent shops as was envisaged during initial phase (para. 30).

29. Anticipating the possibility of change in alignment after trial pit,¹² 100% socio economic survey was conducted for all the vendors/hawkers in both side of the road where water supply and sewerage networks pipeline are to be laid. During actual pipe laying, only one side/front will be utilized. Prior to conducting inventory loss survey, project area was categorized based on level of commercial activities/structures (high, medium and low density). 100% socio economic survey was conducted in high and medium density areas. No mobile vendors or otherwise were located in low density areas during transect walks. The subproject is expected to cause temporary loss of access/disruption to livelihood during civil works to 435 non-titled movable /transitory structure (pushcarts etc.)¹³ vendors/traders located at both sides of the road. After finalization of exact alignment, joint re-confirmatory survey will be conducted by the officials of PIU, CMSC and contractor to finalize the list of APs likely to be impacted due to civil works. While finalizing the alignment, efforts will be made to avoid the impacts, and accordingly, the affected persons present in that particular section will be included in the mitigated list having no impacts. Those who will be impacted will be paid assistance as per agreed entitlement matrix. All the progress will be reported to ADB through bi-annual social monitoring report. Based on data from the socio-economic survey, estimated 56% (256) of the affected persons belong to vulnerable category.¹⁴ Impact identified area wise is presented in Table 11 and 12. The photographs of the high and medium density areas are placed as **Appendix 29**. The socio-economic profile of temporarily affected persons, photographs taken during survey are attached within **Appendix 30 to 32**.

Table 11: Area wise details of affected persons

S.no	Area	Density	Zone	APs	Vulnerable
1	Near bus-stand	Medium	1	30	6
2	Fruit Gali	High	1	25	12

¹¹ Common property resources include public resources, community-owned facilities or cultural property such as temples, shrines, public utility posts, etc, that the landless poor and vulnerable depend on for survival.

¹² Contractor shall excavate trial pit before finalizing the layout of the water supply as well as sewer lines for obtaining information of subsurface soil conditions and underground utilities. Contractor will carryout the site visit with employers's representative for trial pits and locate the trial pits on possible layout.

¹³ Resettlement impacts based on the detailed survey.

¹⁴ Vulnerable households comprise below poverty line households, female-headed households, households with out of school/working children, disabled person-headed household, elderly headed household, landless household, household with no legal title/tenure security, and schedule castes and scheduled tribe households.

3	Kailash Medical	Medium	1	11	0

Source: Socio-Economic Survey Feb 2021

30. . As far as impacts on permanent shops are concerned, contractor and PIUs have already ensured that to avoid any inconvenience to permanent shops, an engineering solution will be adopted and civil work can be done on 'convenient hours' / night time/non-peak hours/trenchless method¹⁵ after required consultations with the shop owners. Work will be carried out in small patches with proper planning of traffic. Decision taken by PIU and Contractors also communicated to permanent shopowners and they have ensured their support to implementation agency for smooth execution of the subproject. **(Ref Appendix 33)**. The contractor will be also be required to maintain access to shops and residences or other buildings along pipe alignments and to institutions located close to proposed sites. Safety will also be ensured through hard barricading of excavated alignments/sites, in line with EMP provisions.

31. The last date of the 100% socio-economic survey (along probable corridor of impact based on detailed design) is considered as the cut-off date which is 21 February 2021 for this subproject. Persons who settle in the affected areas after the cut-off date will not be eligible for compensation and assistance. High and medium density areas marked on Figure 16 below.

¹⁵ As a general practice, trenchless pipe laying technology will be adopted in sections where proposed pipe excavation depth is more than 3.5 m; unless available right of way (RoW) is adequate and site conditions favourable for open cut excavation. The Contractor will maintain the noise levels within permissible limits.

Figure 16: High and Medium Density areas marked on Map

Source: Preliminary Detailed Project Report, Abu Road

32. Summary impacts based on the findings of the inventory loss survey and 100% socio-economic survey is presented below. The survey was conducted on both sides of the road and data from all vendors were considered; however, execution of work and the impacts will be limited to only one side of the road (actual pipe laying corridor, which is yet to be finalized) and the number of probable affected persons (mobile vendors/ pushcarts etc.) will come down considerably.

Table 12: Summary of Involuntary Resettlement and Indigenous Peoples Impact

S.No.	Details	Affected Persons	Remarks
1.	Permanent land acquisition	None	Not required.
2.	Structure loss/permanent relocation impact	None	Not anticipated
3.	Permanent and significant livelihood impact (land owners)	None	Not anticipated
4.	Loss of crops (farming by non-titleholders)	None	Not anticipated
5.	Permanent loss of livelihood	None	Not anticipated
6.	Temporary loss of access/disruption to livelihood	Yes	As per survey data, an estimated 435 –non-titled movable /transitory structures (push carts etc.) are anticipated to face temporary income loss.
7.	Potential temporary income loss to employees in affected shops/ businesses	None	Not anticipated.
8.	Number of Vulnerable APs*	Yes	Based on data from the socio-

S.No.	Details	Affected Persons	Remarks
			economic survey, 56% of the affected persons (245 out of 435) belong to vulnerable category. Out of the total 245 affected persons from vulnerable category 193 are females (female headed households-FHH), 11 are from scheduled caste (SC) and 41 belong to scheduled tribe (ST) community.
9.	Affected IP	Yes	Impacts are limited to 41 scheduled tribe persons in terms of temporary loss of income due to loss of access. This is assessed as an involuntary resettlement impact to the scheduled tribe / vulnerable persons. As per agreed resettlement framework, the affected persons are entitled to additional compensation and assistances which is considered and budgeted in this RIPP. During actual execution of work, the number of affected persons (including those from ST community) is expected to be reduced based on the actual alignment/corridor of impact.

Source: socio-economic survey Feb 2021,

*Vulnerable households comprise below poverty line households, female-headed households, households with out of school/working children, disabled person-headed household, elderly headed household, landless household, household with no legal title/tenure security, and schedule caste and scheduled tribe households.

33. Indigenous People. Based on census and socio-economic survey, among the affected persons facing involuntary resettlement impacts (temporary income loss) 41 persons belong to scheduled tribe. These persons are using the RoW for running their livelihood through selling of fruits, garments, flowers etc. and will be impacted for temporary period of work. The temporary loss of urban livelihoods to scheduled tribe persons is assessed as a temporary involuntary resettlement impact. During freezing of final alignment, efforts will be made by the implementing agency to avoid impacts by providing access for continuation for their livelihood. In case such temporary livelihood impacts cannot be avoided, additional compensation and assistances as per agreed resettlement framework will be disbursed. In order to mitigate negative impacts on ST persons, before and during the subproject design, implementation, as well as monitoring process, the project staff will enhance the dissemination of project information and conducting meaningful consultation especially with ST persons to ensure that they get the maximum benefit from the advantage conditions brought by the subproject and fully understand their entitlements under this RIPP. No civil works will be allowed in sections of impact and compensation payment will be completed prior to start of civil works. Social safeguard requirements are included in the EMPs and bid documents.

34. The socio-economic profile of the scheduled tribe community of Abu Road Tehsil (sub-district) and Abu Road Town is discussed in the next chapter. Project provision includes 100% water supply house service connections in the coverage area, including to scheduled tribe households. Additionally, bulk water supply will be provided to 6 villages which are located along the alignment of the transmission main. The 6 villages have a total population of 16,498 and total tribal population 5573 (34%); the total population of the 6 villages including 100% scheduled tribe population is expected to benefit from the bulk water supply. Moreover, 5891 scheduled tribe population (10.59% of total population and 100% of scheduled tribe population) in project town will be benefited through improved wastewater infrastructure.

35. **Specific Action Plan.** Further, to address any potential safeguards issues and ensure maximum benefits reach the scheduled tribe households, a specific action plan for indigenous peoples is proposed for this subproject. The action plan will carry out the following specific activities: (i) a baseline survey¹⁶ will be conducted for identification and inclusion of indigenous peoples households within the project coverage area; (ii) proposed benefits (e.g.) to indigenous peoples households will be shared and monitored; (iii) IEC materials, information sharing, consultations and other activities¹⁷ stated in the CAPP will be culturally sensitive and appropriate when implemented in the scheduled area; (iv) in case of any indigenous peoples impacts in subproject, the chief of the tribe or a member of the tribal council as traditional arbitrator (to ensure that traditional grievance redress systems are integrated) and an NGO working with indigenous peoples. GRC will also ensure that grievance redress established is gender inclusive in receiving and facilitating resolution of the IPs' concerns; (v) consultations with IP households will be conducted in all subproject stages which shall help in identifying any culture-specific requirements and traditions like avoidance of any specific festival days, and/or other activities with cultural significance to the IP communities during civil work; and any other IP related issues and concerns that may be of importance to the community. An end-line sample survey¹⁸ will be conducted to document the views of IP households about subproject benefits. Such survey is in line with subproject internal monitoring. The proposed action plan with activities, timelines and responsibilities is attached in **Appendix 34**. This action plan will be used for project monitoring to ensure that IP activities are undertaken on a timely basis and reported semi-annually and to determine whether project objectives have been achieved.

36. Project contractors already initiated consumer survey for collecting baseline data including ST households. Based on the baseline data house service connections for water supply and/or sewerage and FSSM services to all the households including indigenous people's households will be provided. During updating of RIPP, consultation with ST communities was undertaken and it was noticed that Scheduled Tribe (ST) households residing in ABU Road town are assimilated, having settled amongst the non-tribal populations. They are mostly involved in agriculture and farming works. Provision and activities (skill training, formation of groups, linkage with livelihood scheme etc) included under this subproject was informed during consultation.

¹⁶ Contractors will conduct connection campaigns across the project coverage area and will be responsible to ensure that IP households and localities are identified and included in the campaign. Data on exact number of scheduled tribe households can be generated from the house service connection survey (pertaining to both water supply and wastewater/sewerage) to be conducted by the project contractor prior to start of civil work. The localities where sewerage network will not laid shall be covered through FSM. Cost for such activity is already included in the contract document for the subproject.

¹⁷ CAPP will be primarily responsible for planning implementing and monitoring the result of such activities.

¹⁸ Cost towards conducting end-line sample survey is included in the subproject budget table. Sample size may be decided by the Project in consultation with ADB.

37. **Gender Considerations and Impacts:** Among the affected persons facing involuntary resettlement impacts (temporary income loss) there are 193 females (female headed households), running their livelihood through selling of fruits, garments, flowers etc. During freezing of final alignment, efforts will be made by the implementing agency to provide access for continuation for their livelihood. In case temporary livelihood impact cannot be avoided, additional compensation and assistances as per agreed resettlement framework a will be disbursed to them.

III. SOCIO-ECONOMIC INFORMATION AND PROFILE

38. The following sections present socio-economic profile of the households likely to be affected by the proposed works. Based on census and a socio-economic survey about 435 persons will potentially be affected under the subproject. The survey provides information on the socio-economic conditions of affected households. A wide range of data including, social category, type of losses, type of occupation, sources of income, choice of resettlement etc have been collected. About 56% of the affected persons belong to vulnerable category.

39. **Income Profile:** Among the surveyed affected persons, about 22% (93 APs) of the have income of ₹ 100-200 per day while 51% (223 APs) have income of ₹ 201-300 per day. About 27% (119 APs) of the surveyed households have income of ₹ 301-400 per day. Average daily income estimated to be ₹ 297 per day, is higher than the declared Government daily wage rate¹⁹ for different categories of labour (including highly skilled labour). Refer **Appendix 35** for government notification on minimum wage rate in Rajasthan.

40. **Vulnerability:** Among the surveyed households (435), 56 % (245 APs) affected persons are categorised as vulnerable. Out of 245 affected persons from vulnerable category, 4% (11 APs) are scheduled caste, 17 % (41 APs) are from the Schedule Tribe and 79% (193 APs) from female headed households.

¹⁹ As per the state gazette notification dated 19th August 2020, the latest (applicable from 12th August 2020) revised minimum daily wages for different category of labour are as below Unskilled= ₹ 225/-; Semi Skilled= ₹ 237/-; Skilled= 249/

41. **Caste Profile:** All socio-economic details of 435 surveyed households presented in **Annexure 30**. Persons from general caste comprise 3% (15 APs), other backward castes (OBC) comprises 65% (281 APs), persons from scheduled caste community comprises 6% (25 APs) and persons from scheduled tribe comprise 26 % (114 APs) of the total households likely to be affected.

42. The summary profile of the project affected persons along with their business and income profile are presented table 13 and 14 below.

Table 13: Summary Profile of Affected Persons*

Impact	Quantity
1. Loss of land	
Permanent land acquisition	0
Temporary land acquisition	0
2. Loss of structures	
Residential	0
Commercial	0
3. Loss of livelihood	
Permanent	0
4. Temporary Impact	
Temporary loss of land	0

Impact	Quantity
Estimated number of Persons facing temporary loss of access/disruption to livelihood ²⁰	435 – Mostly non-titled movable /transitory structures (push carts etc.)
5. Estimated number of Vulnerable Affected Persons facing temporary impact	245
Scheduled caste	4%
Scheduled Tribe	17%
Women Headed Households	79%
Socio-economic Profile	
6. Average income/day (shops)	₹ 297 /day ²¹ (Daily income ranges from ₹ 100-400/ day)

Source: Transect walks, socio-economic survey Feb 2021

*The estimated number of affected persons presented in the table is based on socio-economic survey and inventory loss survey/ impact assessment for the entire subproject area where pipelines are proposed to be laid (both sides of the road). After the final alignment is finalized, this estimated number will come down as pipe will be laid on one side of the road only. The actual impacted persons and the compensation details will be updated and reported in the subsequent semi-annual social monitoring report for approval of ADB.

Table 14: Summary Profile of Affected Business

Street Stretch	No. of Affected Persons	Average Income Range (Rs)	Types of businesses
A. High Density			
a. Below poverty line (BPL) ²²	0	0	NIL
b. FHH	170	Rs 100-350	Fruit and vegetables, Snacks, Garments, Tea Stall, Cosmetics, Sweets etc
c. SC	07	Rs 200-350	Fruit and vegetables, Snacks, Tailoring
d. ST	33	Rs 200-350	Fruit and vegetables, Cobbler, Electronix, Tailoring
e. General and Others	125	Rs 100-400	Fruit and vegetables, Snacks, Garments, Tea Stall, Cosmetics, Sweets etc
Total Mobile/Street vendor	325	Rs 100-400	Fruit and vegetables, Snacks, Garments, Tea Stall, Cosmetics, Sweets etc

²⁰ The affected persons under temporary impacts (if impacted by the project) not traceable for more than 18 months after the start of compensation disbursement, or do not claim their entitlement within project construction period, will bear no impacts of the project and hence will not be considered for compensation.

²¹ Total income per day of Surveyed APs (435) total income per day comes to Rs(₹) 129,225 and accordingly an average of Rs(₹) 297 per day has been arrived. The average income arrived Rs(₹) 297, is greater than the current minimum wage rate prevalent at Rajasthan. Refer Appendix 35.

²² Government of Rajasthan has in recent times been using the indicators of National Food Security Act (NFSA, 2013) for estimation of poverty in the state. Under NFSA, the state has set the inclusion and exclusion criteria. Based on these, poor and deprived have been identified by village/urban local general body through participatory approach. So far, about 53% of the beneficiaries in the urban areas have been identified using this method. For urban areas, inclusion criteria includes BPL families already identified under 2003 urban BPL census, all state BPL families, Antyodaya and Annapurna beneficiaries, families not included in preceding category but are beneficiary under schemes (7 schemes are mentioned) such as chief minister senior citizen yojana, Indira Gandhi national old age pension scheme, Indira Gandhi widow pension schemes and other listed national/state social assistance schemes or if they are- surveyed families from slums, rag pickers, registered construction labour, rickshaw pullers, vendors and others (13 such groups are identified). Similarly, 7 exclusion parameters such as income tax payee in the family, family member in government/semi government employment, assets such as four wheeler (unless it constitutes source of livelihood), pucca (concrete) house of size greater than 1000/1500 ft² (as per type of urban area) etc are mentioned. Source: <https://niti.gov.in/writer/READDATA/FILES/RAJASTHAN.PDF>. During survey respondents were inquired about their official BPL status. This information is reflected in the document.

Street Stretch	No. of Affected Persons	Average Income Range (Rs)	Types of businesses
B. Medium density			
a. BPL	0	0	NIL
b. FHH	23	Rs 150-350	Fruit and vegetables, Snacks, Garments,
c. SC	04	Rs 300-350	Fruit and vegetables, Flowers Garments,
d. ST	08	Rs 200-350	Snacks, Tea Stall, Readymade Garments, Fruits
e. General and Others	75	Rs 135-400	Fruit and vegetables, Snacks, Garments, Tea Stall, Cosmetics, Sweets etc
Total Mobile/Street vendor	110	Rs 135-400	
C. Low density			
No hawkers and vendors on road/existing pipeline RoW. Access to businesses, residences and institutions will be provided, if required.			

Source: Transect walks, Socio-Economic Survey Feb 2021

43. **Profile of indigenous peoples in Abu Road Tehsil (sub-district):** As per Census 2011, the total population of Abu Road Tehsil is 149,098 out of which 104,888 (70.34%) is scheduled tribe. The total population of Abu Road Municipal area and adjoining urban conglomerate is 55,599 out of which scheduled tribe comprise 5,891 (10.59%). Hence, it could be ascertained that the scheduled tribe population is predominately based in rural areas. Out of 5,891 total schedule tribe population, 3,071 (52.14%) are males and 2820 (47.86%) are females. Percentage of scheduled tribe males in respect of total males in Abu Road Town is 10.42% and that of females it is 10.78%. Summary of analysis is provided in Table 15 and 16.

Table 15: Scheduled Tribe Population in Abu Road Town and Tehsil

Total Population		Scheduled Tribe	Percentage (%)	Total schedule tribe Male	Percentage (%) in respect of column 2	Total Scheduled Tribe Female	Percentage (%) in respect of column 2
1		2	3	4	5	6	7
Abu Road Tehsil	149,098	104,888	70.34	53,054	50.58	51,834	49.42
Abu Road Town	55,599	5,891	10.59	3,071	52.14	2820	47.86

Source: Census 2011

Table 16: Sex-disaggregated Data of Scheduled Tribe Population to Total Population in Abu Road Town

Total Male Population	Total Scheduled Tribe Male	Percentage (%)	Total Female Population	Total Scheduled Tribe Female	Percentage (%)
29,454	3,071	10.42	26,145	2,820	10.78

Source: Census 2011

44. Ward no. 31 has the highest concentration of scheduled tribe population (612 persons) followed by ward 22 which has 475 persons and about 393 persons from the scheduled tribe community live in ward 19.

45. In Abu Road Municipality and urban agglomerate areas literacy among scheduled tribe community is 59.45% for males and 40.55% for females. As per census 2011 data on work force participation males comprise 84.13% which means that female work force participation is substantially low (about 15.86%).

46. During interactions with the tribal community in ward 2 and ward 3, it was observed that Bheel Parmer and Garasia tribe are predominantly settled in Abu Road Town. Unemployment is stated as the biggest issue plaguing the community. Access to drinking water from the municipal source is available, but low or inadequate supply issues were reported.

IV. CONSULTATION, PARTICIPATION AND DISCLOSURE

A. Public Consultation

47. This updated RIPP was prepared in consultation with stakeholders. The key stakeholders consulted during RIPP preparation and updating include (i) affected persons, vulnerable households including scheduled tribegroups; (ii) program beneficiaries (iii) elected representatives, community leaders, and representatives of community- based organizations; (iv) local government and relevant government agency representatives; and (vi) Program staff, PMU, PIU, and consultants. Meetings and individual interviews were held involving stakeholders particularly, potentially temporarily affected persons; and transect walks, survey and interviews were conducted to determine the potential impacts of subproject. During meeting they were briefed about the technical details of project and project implementation cycle; project benefits as well as adverse impacts envisaged during construction; environmental and social safeguards, gender inclusion, community participation aspects built into the project etc. The issues like, awareness and extent of the project and development components, benefits of project, traffic disruptions and impacts on livelihood. It was informed to APs surveyed that appropriate measures will be undertaken during construction to minimize impacts. (Including scheduling of activities and reducing construction activities during the rush hour). It was also informed that, if despite mitigation measures, there would be any temporary impacts on livelihood; these would be compensated in accordance with the resettlement framework/ indigeneous peoples framework of the project and RIPP's entitlement matrix. Further, consultations will also include focus group discussions (FGDs) and will be continued throughout the project cycle. Details of consultation are attached in **Appendix 36**. Leaflet with information about the subproject, its benefits, grievance redress mechanism were also distributed to the households in the month of Jan 2021). (Ref **Appendix 31**)

B. Information Disclosure

48. The draft RIPP was uploaded in ADB and local government's websites and this updated version one will also be disclosed similarly. This RIPP will also be available in key local/state government offices. As subproject is being started, implementation, construction schedules are being informing to all residents (including APs) prior to the commencement of pipe laying through signboards. The signboards displayed at sites contains start and end dates of construction work at the location contact information for questions/grievances. During updating of RIPP, cut-off-date for temporary impacts was communicated in the entire affected area at the start of the census survey and also list of potential affected persons was displayed area wise on dated **17.02.2021** and at the same time for the entire city to prevent duplication in identification of affected persons specifically those moving into a new area during project planning and implementation phase. Copy of cut off date and Photographs of cut off date displayed is attached in **Appendix 37and 38**. Such information sharing will facilitate affected persons to

have access to lists in their area and resolve issues around any duplication, missing/absentee person from the list. RPPs/IEC materials will be translated in Hindi and will be disclosed/discussed with APs and beneficiaries, including those who are unable to read, in Hindi and/or their local dialect.

C. Continued Consultation and Participation

49. Consultation and disclosure is a continuous process since from the beginning of the project. Information dissemination is being carried out through out project circle include persons from the scheduled tribe community. The project management consultants have already conducted training of contractors representative such as engineers as well as safeguards personnel. **(Ref Appendix39)**; community groups were consulted and information disseminated about the civil works and project activities, anticipated impacts and mitigation measures, grievance redress process. The PMU, with the support of CAPPC, will design and conduct a public awareness campaign which shall target all citizens including scheduled tribe communities during project implementation. A consultation and participation consultant will be mobilized for preparation and implementation of community awareness activities and include schedule tribe communities in such activities.

V. GRIEVANCE REDRESS MECHANISM

50. A project-specific, three-tier grievance redress mechanism (GRM) covers both environment and social issues. The GRM has been established to receive, evaluate, and facilitate the resolution of affected persons' concerns, complaints, and grievances about the social and environmental performance at project level. The GRM will aim to provide a time-bound and transparent mechanism to voice and resolve social and environmental concerns related to the project. Assessment of the GRM designed and implemented for Rajasthan Urban Sector Development Program (RUSDP)²³ shows that the system was effective in timely resolution of grievances in a transparent manner.²⁴ The multichannel, project-specific, three-tier GRM is functional at RUSDP, hence the design of GRM for RSTDSP takes into account the proposed institutional structure for RSTDSP and the positive features and learnings from the previous GRM.²⁵

²³ The procedures followed for grievance redress during implementation of RUSDP Phase III included the project GRM and the pilot GRM software application (Smart Check) in Pali, the Sampark portal of Government of Rajasthan, and the Chief Minister's helpline. Complaints received through various channels were mostly minor and pertained to damage to existing water supply pipelines and disruption of water supply during construction, delays in road restoration, and pending new connections. Complaints related to damage to private property (compound walls/steps, etc.) were less in number. The grievances were mostly possible to resolve in coordination with the contractors. Complaints received were immediately referred by the CAPC/PMDSC supervision staff to the PIU Nodal officer (safeguards) and concerned engineer at PIU, who advised them on further action. Follow up with the contractor on complaint resolution was undertaken by PIU Nodal officer CAPC and PMDSC and final feedback sought from complainant upon resolution. Complaints requiring inter-departmental coordination were referred to the PMU for resolution, and feedback provided to complainant. The PMU kept regular track of grievances through WhatsApp and email alerts, ensuring registration and follow-up until resolution.

²⁴ Town-level grievance registration data indicates that a large number of grievances were registered, pointing to the effectiveness of the multi-channel GRM. No major grievance was received for RUSDP Phase III. The GRM helped smoothen the process of project implementation, hence the proposed architecture for the RSTDSP GRM remains similar, with some refinement, taking into account the changes in institutional setup proposed for project implementation.

²⁵ Continued logistics support at field level will be key to successful management of grievance redress under RSTDSP. The target date for establishment of the first level (PIU level) and second level (Zonal level) of GRM is before loan negotiation.

51. **Common GRM.** A common GRM will be in place for social, environmental, or any other grievances related to the project. Implementation of the resettlement plans/RIPPs/DDRs/IEEs will follow the GRM described below. The GRM will provide an accessible and trusted platform for receiving and facilitating resolution of affected persons' grievances related to the project.

52. Public awareness campaigns within entire ULB/Municipal area will ensure that awareness on grievance redress procedures is generated. The nodal officer- safeguards and gender supported by ASO at zonal level, will oversee the conduct of ULB/project coverage area-based awareness campaigns by the town-level safeguards and safety officers, through the CAPPC. The awareness campaigns will ensure that poor and vulnerable households are made aware of grievance redress procedures and entitlements. Contractors will provide pamphlets to communities prior to start of works and billboards during construction. The pamphlets and billboards will include relevant environmental and social safeguards, GRM information, and contact details of key personnel from PIU and contractors.

53. Affected persons will have the flexibility of conveying grievances/suggestions by dropping grievance redress/suggestion forms in complaint/suggestion boxes that will be installed by project PIUs or by e-mail, by post, or by writing in a complaints register in ULB offices/complaints register at contractor's work site²⁶ or by sending a WhatsApp message to the PIU²⁷ or by dialling the phone number of town level PIU/CAPPC or by dialling a toll-free number.²⁸ Any aggrieved person can also avail the facilities of online grievance monitoring system 'Rajasthan Sampark' portal to register their grievances which is a parallel mechanism of grievance registration, in addition to the project GRM.²⁹ Careful documentation of the name of the complainant, date of receipt of the complaint, address/contact details of the person, location of the problem area, and how the problem was resolved will be undertaken and feedback provided to the complainant on action/decision taken. The SSO of town/city level PIU will have the overall responsibility for timely grievance redressal on environmental and social safeguards issues and for registration of grievances, related disclosure, with the assistance of project consultants. In case of grievances that are immediate and urgent in the perception of the complainant, the contractor, and officials of PIU with assistance from CMSC and CAPPC on-site will provide the most easily accessible or first level of contact for quick resolution of grievances. Contact numbers and names of the concerned PIU safeguard and safety officer, contractors, CAPPC and CMSC personal will be posted at all construction sites at visible locations.

- (i) **1st level grievance.** The contractors, PIU executive engineer /assistant engineer designated as SSO (social and environment), CMSC (safeguard staff) and CAPPC can immediately resolve issues on-site, in consultation with each other and will be required to do so within 7 days of receipt of a complaint/grievance. If

²⁶ RUSDP piloted an online application based live GRM counter for resolution of public grievances over and above the usual process of grievance registration and redressal. This app based GRM - "RUIDP Smart Check" is available at Google play store (free of cost) and is operational. The RUIDP Smart Check "app" was launched in Pali town in July 2017 and is proposed to be scaled up in RSTDSP project towns. For persons without access to the application, the traditional channels will continue to be available.

²⁷ It is suggested for each PIU to have a dedicated WhatsApp group for registration of grievances and receipt of quick feedback, to be followed by more formal communication.

²⁸ Project contractors in all project towns will have a toll-free number with specific working hours for registration of grievances related to RSTDSP.

²⁹ [HTTP://WWW.SAMPARK.RAJASTHAN.GOV.IN/RAJSAMWELCOME.ASPX](http://www.sampark.rajasthan.gov.in/RajSamWelcome.aspx)

- required, city level monitoring committee (CLMC)³⁰ will be involved in resolution of grievances at the 1st level;
- (ii) **2nd level grievance.** All grievances that cannot be redressed within 7 days at field/PIU level will be brought to the notice of Zonal PIU headed by Additional Chief Engineer (ACE). The ACE at zonal PIU will resolve the grievance within 7 days of receipt of complaint/grievance in discussion with the assistant safeguard officer (ASO), field level PIU, CMSC, CAPPC and the contractor;
 - (iii) **3rd level grievance.** All the grievances that are not addressed by Zonal PIU within 7 days of receipt will be brought to the notice of the PMU. Depending on the nature of grievance, the Project Officer (Social/Environment) at PMU will resolve the grievance within 15 days of receipt of grievance with necessary coordination of Zonal PIU and CMSC and guidance/instruction of additional project director (APD-PMU).

54. Grievances not redressed through this process within/at the project level within stipulated time period will be referred to the CLC/grievance redress committee (GRC), which has been set up.³¹ In its role as a GRC, the CLC will meet whenever there is an urgent, pending grievance. Other grievances can be discussed during its regular meetings. Zonal PIU will inform the CLC regarding any grievances required to be resolved urgently. The GRC will resolve the grievance within 15 days of receiving the complaint. In case of any indigenous peoples impacts in subprojects, the CLC/GRC must have representation of the affected indigenous people community, the chief of the tribe or a member of the tribal council as traditional arbitrator (to ensure that traditional grievance redress systems are integrated) and an NGO working with indigenous people groups. GRC will also ensure that grievance mechanism established is gender inclusive in receiving and facilitating resolution of the IPs' concerns.

55. The multi-tier GRM for the project is outlined below (Figure 17), each tier having time-bound schedules and with responsible persons identified to address grievances and seek appropriate persons' advice at each stage, as required. The GRC will continue to function throughout the project duration.

³⁰ The CLMC has been formed at the town/city level for planning and monitoring of work, resolve issues related to departmental coordination etc. It is headed by Commissioner/Executive Officer ULB (Chairman) and city engineer of public health engineering department (PHED), public works department (PWD) and head of PIU acting as Member Secretary.

³¹ City Level Committee (CLC)/grievance redress committees (GRCs) has been constituted for each town/city under the Chairmanship of District Collector to provide overall subproject guidance and "to sort out issues and remove hindrances, if any". CLC formed at city-level/district level with members composed of: District Collector as Chairperson, and following as members: ULB Commissioner/Mayor/Chairman; Deputy Mayor/Vice Chairman ULB; Chairman / Secretary Urban Improvement Trust (UIT); Head of Zonal/field level PIU as Member Secretary; one representative each from relevant government departments as appropriate (PWD/PHED/Town Planning Department etc.). All CLCs in their role as GRCs will have at least one-woman member/chairperson. In addition, for project-related grievances, representatives of affected persons, community-based organizations (CBOs), and eminent citizens will be invited as observers in GRC meetings. The concerned Member of Parliament (MP) and Member of Legislative Assembly are also part of the CLC.

Figure 17: Grievance Redress Mechanism-RSTDSP

Note: APD = additional project director, ASO = assistant safeguards officer, CAPPCC = community awareness and public participation consultant, CMSC = construction management and supervision consultants, CLC = city level committee, CLMC = city level monitoring committee, GRC = grievance redress committee, PIU = project implementation unit, PMU = program management unit, PMCBC = project management and capacity building consultant

56. The project GRM notwithstanding, an aggrieved person shall have access to the country's legal system at any stage and accessing the country's legal system can run parallel to accessing the GRM and is not dependent on the negative outcome of the GRM. In case of grievance related to land acquisition, resettlement and rehabilitation, the affected persons will have to approach a legal body/court specially proposed under the RFCTLARRA, 2013.³²

57. People who are, or may in the future be, adversely affected by the project may submit complaints to ADB's Accountability Mechanism. The Accountability Mechanism provides an independent forum and process whereby people adversely affected by ADB-assisted projects can voice, and seek a resolution of their problems, as well as report alleged violations of ADB's operational policies and procedures. Before submitting a complaint to the Accountability Mechanism, affected people should make an effort in good faith to solve their problems by

³² The Authority admits grievance only with reference to the Land Acquisition and R&R issues under the RFCTLARRA, 2013.

working with the concerned ADB operations department. Only after doing that, and if they are still dissatisfied, should they approach the Accountability Mechanism.³³

58. **Record-keeping.** The PIU of each town/city will keep records of grievances received, including contact details of complainant, date the complaint was received, nature of grievance, agreed corrective actions and the date these were affected and final outcome. The number of grievances recorded and resolved, and the outcomes will be displayed/disclosed in the PMU office, PIU offices, and on the web, as well as reported in monitoring reports submitted to ADB on a semi-annual basis. The sample **Grievance registration format is attached as Appendix 40.**

59. **Periodic review and documentation of lessons learned.** The PMU project officers (Social and Environment) will periodically review the functioning of the GRM in each town and record information on the effectiveness of the mechanism, especially on the project's ability to prevent and address grievances.

60. **Costs.** Contractors are required to be allocated budget for pamphlets and billboards as part of the EMP. Costs involved in resolving the complaints (meetings, consultations, communication and reporting/information dissemination) will be borne by the concerned PIU at town level while costs related to escalated grievances will be met by the PMU. Cost estimates for grievance redress are included in resettlement cost estimates.

61. Office order of PMU also issued to all PIUs/CMSC to follow the grievance redress mechanism(**Ref Appendix 41**). Contractor also shared toll free number with the households through their social outreach team for lodging of complain/grievance, if any during execution of works.

VI. POLICY AND LEGAL FRAMEWORK

62. The policy framework and entitlements for the RSTDSP are based on:

- (i) the The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act (RFCT in LARR), 2013;³⁴
- (ii) ADB's Safeguard Policy Statement (SPS), 2009. The salient features of Government and ADB policies are summarized below. The resettlement principles and procedures to be followed for social safeguards under RSTDSP are detailed out in the RF document.

63. The key involuntary resettlement principles of the ADB Safeguards Policy Statement (2009) are:

- (i) Screen the project early on to identify past, present, and future involuntary resettlement impacts and risks. Determine the scope of resettlement planning through a survey and/or census of displaced persons, including a gender analysis, specifically related to resettlement impacts and risks;
- (ii) Carry out meaningful consultations with affected persons, host communities, and concerned nongovernment organizations. Inform all displaced persons of their

³³ Accountability Mechanism. <http://www.adb.org/Accountability-Mechanism/default.asp>.

³⁴ Ministry of Law and Justice. The Act has received the assent of the President on the 26 September 2013.

entitlements and resettlement options. Ensure their participation in planning, implementation, and monitoring and evaluation of resettlement programs. Pay particular attention to the needs of vulnerable groups, especially those below the poverty line, the landless, the elderly, women and children, and Indigenous Peoples, and those without legal title to land, and ensure their participation in consultations. Establish a grievance redress mechanism to receive and facilitate resolution of the affected persons' concerns. Support the social and cultural institutions of displaced persons and their host population. Where involuntary resettlement impacts and risks are highly complex and sensitive, compensation and resettlement decisions should be preceded by a social preparation phase;

- (iii) Improve, or at least restore, the livelihoods of all displaced persons through (a) land-based resettlement strategies when affected livelihoods are land based where possible or cash compensation at replacement value for land when the loss of land does not undermine livelihoods, (b) prompt replacement of assets with access to assets of equal or higher value, (c) prompt compensation at full replacement cost for assets that cannot be restored, and (d) additional revenues and services through benefit sharing schemes where possible;
- (iv) Provide physically and economically displaced persons with needed assistance, including the following: (a) if there is relocation, secured tenure to relocation land, better housing at resettlement sites with comparable access to employment and production opportunities, integration of resettled persons economically and socially into their host communities, and extension of project benefits to host communities; (b) transitional support and development assistance, such as land development, credit facilities, training, or employment opportunities; and (c) civic infrastructure and community services, as required;
- (v) Improve the standards of living of the displaced poor and other vulnerable groups, including women, to at least national minimum standards. In rural areas provide them with legal and affordable access to land and resources, and in urban areas provide them with appropriate income sources and legal and affordable access to adequate housing;
- (vi) Develop procedures in a transparent, consistent, and equitable manner if land acquisition is through negotiated settlement to ensure that those people who enter into negotiated settlements will maintain the same or better income and livelihood status;
- (vii) Ensure that displaced persons without titles to land or any recognizable legal rights to land are eligible for resettlement assistance and compensation for loss of non-land assets;
- (viii) Prepare a RIPP elaborating on displaced persons' entitlements, the income and livelihood restoration strategy, institutional arrangements, monitoring and reporting framework, budget, and time-bound implementation schedule;
- (ix) Disclose a draft RIPP, including documentation of the consultation process in a timely manner, before project appraisal, in an accessible place and a form and language(s) understandable to affected persons and other stakeholders. Disclose the final RIPP and its updates to affected persons and other stakeholders;
- (x) Conceive and execute involuntary resettlement as part of a development project or program. Include the full costs of resettlement in the presentation of project's costs and benefits. For a project with significant involuntary resettlement impacts, consider implementing the involuntary resettlement component of the project as a stand-alone operation;

- (xi) Pay compensation and provide other resettlement entitlements before physical or economic displacement. Implement the RIPP under close supervision throughout project implementation; and
- (xii) Monitor and assess resettlement outcomes, their impacts on the standards of living of displaced persons, and whether the objectives of the RIPP have been achieved by taking into account the baseline conditions and the results of resettlement monitoring. Disclose monitoring reports.

64. Core involuntary resettlement principles for the RSTDSP to be followed for each subproject, including sample subprojects are:

- (i) land acquisition, and other involuntary resettlement impacts will be avoided or minimized exploring all viable alternative sub-project designs;
- (ii) adverse impacts to indigenous peoples' dignity, human rights, livelihood systems and culture as well as to the natural and cultural resources of indigenous peoples will be avoided;
- (iii) where unavoidable, time-bound resettlement plans (RPs)/RIPPs/IPPs will be prepared and affected persons will be assisted in improving or at least regaining their pre-program standard of living;
- (iv) full information and close consultations with affected persons including consultation with affected persons on compensation, disclosure of resettlement information to affected persons, and participation of affected persons in planning and implementing sub-projects will be ensured;
- (v) vulnerable groups will be provided special assistance; beneficial impacts to indigenous peoples will be ensured through special measures identified in the IPP/RIPP, if any.
- (vi) payment of compensation to affected persons including non-titleholders (e.g., informal dwellers/squatters, and encroachers) for acquired assets at replacement rates;
- (vii) payment of compensation and resettlement assistance prior to the contractor taking physical acquisition of the land and prior to the commencement of any construction activities;
- (viii) provision of income restoration and rehabilitation; and
- (ix) Establishment of appropriate grievance redress mechanisms.

VII. ENTITLEMENTS, ASSISTANCE AND BENEFITS

A. Types of Losses and Affected Person (AP) Category

65. The types of involuntary resettlement impacts and losses³⁵ due to the proposed subproject components under RSTDSP comprise (i) potential temporary income loss to vendors due to access disruption and (ii) impacts to vulnerable persons (from amongst the affected persons).

³⁵ temporary income loss to employees of vendors, as a loss category was not identified during impact assessment and socio-economic survey.

66. According to ADB SPS 2009 in the context of involuntary resettlement with reference to economic impacts, affected persons (APs) are those who are economically displaced (loss of productive land, structures, assets, access to assets, income sources, or means of livelihood). The absence of formal and legal title to the land does not bar the affected person from receipt of compensation and resettlement assistance from the project. Vulnerable affected persons are eligible for additional compensation and assistance and are to be accorded priority in employment in project related construction activities.

B. Entitlements

67. As per agreed resettlement framework, all the affected persons will be eligible for compensation for temporary income loss. For construction activities involving unavoidable livelihood disruption, compensation for lost income or a transitional allowance for the period of disruption, whichever is greater, will be paid. For this subproject, the estimated period of disruption during pipe laying activities is 14 days. In case the period of disruption is greater than 14 days, the affected persons will be compensated based on the actual number of days of disruption. All affected persons will also be compensated for the time lag (taking into account annual inflation rate) between the time of payment of compensation and the time of survey. 'Shifting assistance' (lump sum ₹1500) will be paid to all affected persons irrespective of their business type. All affected persons who are identified as vulnerable will be eligible for special assistance amounting to ₹9,000 as one-time assistances under temporary impacts for livelihood restoration.

68. All affected persons who are identified in the subproject areas on the cut-off date³⁶ **17 February 2021** will be entitled to compensation for their temporary livelihood loss, and rehabilitation measures (as outlined in the entitlement matrix³⁷ below) sufficient to assist them to improve or at least maintain their pre project living standards, income-earning capacity and production levels. Compensation eligibility is limited by a cut-off date as set for this project on the day of the completion of the census survey which is **17 February 2021**. Affected persons who settle in the affected areas after the cut-off date will not be eligible for compensation and assistance. Affected persons will be provided 30 days advance notice to ensure no or minimal disruption in livelihood. If required, they will also be assisted to temporarily shift for continued economic activity. For example they will be assisted to shift to the other side of the road where there is no construction. Ensuring there is no income or access loss during subproject construction is the responsibility of contractors.

69. Work will be undertaken on one side of the road and temporarily affected persons will be assisted in moving to the other side of the road and returning to their actual place of business after construction is completed. In case moving is not required, access will be ensured by the contractor through measures prescribed in bidding documents/environmental management plan (EMP). An alternate place in the vicinity will also be identified where cluster of persons are affected at one place (e.g. vegetable market) so that they can continue with their livelihood activities.

³⁶ Permanent land acquisition will follow the various cut-off dates as specified under RFCTLARRA, 2013 while for the temporary impacts the start date of census and socio-economic surveys will be considered as cut-off date.

³⁷ Refer Entitlement Matrix.

Table 17: Entitlement Matrix³⁸

S No.	Type of Loss	Application	Definition of Entitled Person	Compensation Policy	Implementation Issues	Responsible Agency
1	Temporary disruption of livelihood	Temporary impacts	Legal titleholders, non-titled APs	30 days' advance notice regarding construction activities, including duration and type of disruption. Cash assistance based on the minimum wage/average earnings per month for the loss of income/livelihood for the period of disruption Contractor's actions to ensure there is no income/access loss consistent with the initial environmental examination IEE.³⁹ Assistance to vendors/hawkers to temporarily shift for continued economic activity (₹ 1,500 as one time assistance)⁴⁰ For construction activities involving unavoidable livelihood disruption, compensation for lost income or a transitional allowance will be paid as per average daily income arrived at from census and socio-economic survey or as per applicable minimum wage, whichever is greater. This assistance shall be paid for a minimum of 14 days or the actual period of disruption, whichever is higher.	Identification of alternative temporary sites to continue economic activity. Contractor's actions to ensure there is no income/access loss consistent with the initial environmental examination. This includes: leaving spaces for access between mounds of soil, providing walkways and metal sheets to maintain access across trenches for people and vehicles where required, increased workforces to finish work in areas with impacts on access, timing of works to reduce disruption during business hours, phased construction schedule and working	Valuation Committee will determine income lost. Contractors will perform actions to minimize income/access loss. For temporary impacts during construction activities, Supervision Consultant SSS with the help of CAPC will assess/verify impacts through structured surveys. Payment will be made by PIU through Treasury.

³⁸ All entitlements in rupees (other than those provided under RFCTLARRA) will be adjusted for inflation till the year of compensation payment.

³⁹This includes: leaving spaces for access between mounds of soil, providing walkways and metal sheets to maintain access across trenches for people and vehicles where required, increased workforces to finish work in areas with impacts on access, timing of works to reduce disruption during business hours, phased construction schedule and working one segment at a time and one side of the road at a time.

⁴⁰For example assistance to shift to the other side of the road where there is no construction. Such assistances will be given only to non-movable businesses (which are not on wheels).

S No.	Type of Loss	Application	Definition of Entitled Person	Compensation Policy	Implementation Issues	Responsible Agency
					one segment at a time and one side of the road at a time	
2	Impacts on vulnerable affected persons	Temporary impacts	Vulnerable affected persons ⁴¹	Livelihood. Vulnerable households will be given priority in project construction employment and provided with income restoration support. Vulnerable persons/businesses will receive ₹9,000 as one time assistance under temporary impacts.	Vulnerable households will be identified during the census.	CMSC will verify the extent of impacts through 100% surveys of affected households and determine assistance, verify and identify vulnerable households. PIU and CMSC will monitor and ensure this entitlement.
3	Any other loss not identified	-	-	Unanticipated involuntary impacts will be documented and mitigated based on ADB's Safeguard Policy (SPS), 2009/RSTDSP RF/EM.	-	CMSC/CAPPC will ascertain the nature and extent of such loss. PMU will finalize the entitlements in line with ADB's SPS, 2009/RSTDSP resettlement framework.

⁴¹ Vulnerable households comprise below poverty line households, female-headed households, households with out of school/working children, disabled person-headed household, elderly headed household, landless households, households with no legal title/tenure security, and schedule caste and scheduled tribe households.

70. If construction activities result in unavoidable livelihood disruption, compensation for lost income or a transitional allowance for the period of disruption whichever is greater will be provided. Vulnerable affected persons will be given priority in project construction employment and provided with additional special assistance for income restoration support. Compensation and assistance to affected persons must be made prior to possession of land/assets/ROW of roads and prior to the award of civil works contracts. Identity cards should be distributed 30 days before compensation. In summary, temporarily affected persons will be provided with:

- (i) 30 days' advance notice regarding construction activities, including duration and type of disruption.
- (ii) Contractor's actions to ensure there is no income/access loss consistent with the initial environmental examination. This includes: leaving spaces for access between mounds of soil, providing walkways and metal sheets to maintain access across
- (iii) trenches for people and vehicles where required, increased workforces to finish work in areas with impacts on access, timing of works to reduce disruption during business hours, phased construction schedule and working one segment at a time and one side of the road at a time.
- (iv) Assistance to mobile vendors/hawkers to temporarily shift for continued economic activity. For example, assistance to shift to the other side of the road where there is no construction.
- (v) For construction activities involving unavoidable livelihood disruption, compensation for lost income or a transitional allowance for the period of disruption whichever is greater.

VIII. RESETTLEMENT BUDGET AND FINANCING PLAN

71. The resettlement budget⁴² for Abu Road sewerage and water supply subproject components includes resettlement assistance, as outlined in the entitlement matrix and contingency provision amounting to 20% of the total cost. The details are provided in **Table 18**. CAPPC team will be involved in facilitating the disbursement process, and will facilitate opening of bank accounts for the affected persons who do not have bank accounts. The total resettlement cost for the subproject is **₹6,099,476**.

72. Details of resettlement plan budget estimation

- (i) Total no of affected persons – Total 435 have been identified as a affected persons during income loss survey. Temporary livelihood losses are estimated for 14 days for each affected person under this subproject.
- (ii) Total no of vulnerable affected persons – As per socio-economic survey 245 affected persons are from vulnerable category.
- (iii) Compensation against daily income loss – as per initial survey the total of daily income for all surveyed affected persons comes to ₹129,225 and accordingly the average of this total figure i.e., ₹297 has been considered as average daily income of affected persons. This average has been applied for all 435 affected

⁴² Due to non freezing of final alignment, survey undertaken both side of the road and accordingly budget has been calculated. Actual number of affected persons will come down as pipe will be laid only on one side of the road.

persons in budget estimation. Vulnerability assistance for RSTDSP has been kept at ₹9000 lump sum.

- (iv) Shifting assistance has been considered for all affected persons. – Based on nature of business of affected person, a uniform amount of ₹ 1500 is proposed as shifting assistance.
- (v) Contingency amount of 20% is also included in budget provisions as cushion for any unforeseen impacts during execution of civil work and to cover for any increase in the number of affected persons at detailed design stage.

Table 18: Budget⁴³

S. No	Item	Unit Nos	Unit Rate* (₹)	Amount ₹
A	Resettlement Costs			
1	Assistance for temporary livelihood impacts for 14 days ⁴⁴	435	297 per day ⁴⁵	1,808,730
2	Shifting Assistance (lump sum)	435	1,500 one time	652,500
3	Assistance for the temporary disruption of livelihood to vulnerable households	245	9000 one time	2,205,000
	Sub-Total A			4,666,230
B	Contingency (20%)			933,246
C	Specific Action Plan: Endline survey, satisfaction survey of sample indigenous peoples households and consultations**	1	500,000	500,000
	Grand Total (A+B+C)			6,099,476

*All cash entitlements and compensation to affected persons will be adjusted against inflation and payment amount determined accordingly.

** Connection campaign and connection survey budget is included under contractor's budget; CMSC will be responsible for supervision, monitoring and report generation related to these surveys. Cost of skill training of community members and internships for community women (including women from indigenous peoples' groups) and awareness campaigns (including indigenous people's groups) is budgeted under project consultants' budgets and is therefore not included in the resettlement and indigenous peoples plan budget.

73. The disbursement of the money for various compensations will be made by the office of district collector through the district treasury by issue of bank cheque or direct deposit in affected persons account. The PIU/project ULB will deposit appropriate amount with the district treasury for the same which will be sourced from resettlement and rehabilitation budget, kept aside as the state share, for this project. The PIU (with CMSC support staff at PIU level) and CAPPC will be involved in facilitating the disbursement process and will facilitate opening bank accounts for the affected persons who do not have bank accounts. PIU will prepare compensation details including names of affected persons, bank account details, compensation

⁴³ Grievance redress costs are part of the contractor's budget and PMU/PIU budgets hence not presented in budget table; and consultation costs are included in consultancy costs and hence not included in this budget.

⁴⁴ For construction activities involving unavoidable livelihood disruption, compensation for lost income or a transitional allowance will be paid as per average daily income arrived at from census and socio-economic survey or as per applicable minimum wage, whichever is greater. This assistance shall be paid for a minimum of 14 days or the actual period of disruption, whichever is higher.

⁴⁵ Total income per day of all surveyed persons comes to Rs 129,225 and accordingly an average of Rs. 297 per day per affected person has been arrived. The average income arrived of (Rs 297 approximately), is higher than the wage rate (Rs 225 per day for unskilled labour, 237 per day for semi skilled and 249 per for skilled labour) notified by government of Rajasthan. Refer Appendix 35.

amount, and submit to the district treasury at least 10 days prior to start of civil work. PIU with support from CMSC field staff and CAPPCC will monitor compensation payment to affected persons. CMSC will confirm timely receipt of payments and document evidence of payments, to be maintained in PIU's records. Zonal PIU will monitor all town level PIUs for compliances in this respect.

IX. INSTITUTIONAL ARRANGEMENTS AND IMPLEMENTATION SCHEDULE

A. Institutional Arrangements

74. Local Self Government Department (LSGD), Government of Rajasthan is the executing agency of the Project. The department is responsible for overall strategic guidance and for ensuring compliance with ADB's loan covenants. RUDSICO is the implementing agency for the RSTDSP responsible for technical supervision and project implementation. The RUDSICO Board under the Chairmanship of the Minister for Urban Development, and members comprising of the Chief Secretary, Secretaries of LSGD, Finance, Planning, Public Works Department (PWD), public health engineering department (PHED) and the project director, RUIDP as member secretary. It have full powers to decide on matters related to RSTDSP. The Board will take needful policy decisions, provide administrative and financial approvals, expedite clearances of project matters, ensure inter-departmental coordination and provide guidance to the PMU. As per GO dated 21 Feb 2018, all powers and responsibilities of earlier state level empowered committee (SLEC, under RUIDP Phase III) have now been transferred to RUDSICO Board.

75. RUDSICO already established a state-level PMU, headed by dedicated project director, and housed in EAP division of RUDSICO. For the purpose of project implementation, 2 zonal PIUs, at Jaipur and Jodhpur, headed by ACE has been established. At field level, town-level PIUs also established for project implementation on ground.

B. Safeguard Implementation Arrangement

76. **Project management unit.** RUDSICO established a state-level PMU, headed by dedicated project director, and housed in EAP division of RUDSICO. For the purpose of project implementation, 2 zonal PIUs, at Jaipur and Jodhpur, headed by ACE has been established. At PMU, there are 2 dedicated project officers: (i) project officer (Environment); and (ii) project officer (Social and Gender), who is responsible for compliance with the environmental, social safeguards and gender in project implementation. Project officer (social and gender) have overall responsibility in implementation of the RSTDSP as per the social safeguards frameworks (resettlement framework and indigenous people planning framework [IPPF]) and gender equality and social inclusion (GESI) Action Plan agreed between ADB and the government, including appropriate monitoring and reporting responsibilities. Project Officer (Social and Gender) at the PMU is supported by the SSS and the gender specialist of PMCBC. Key safeguard and gender mainstreaming related tasks and responsibilities at the PMU level are as follows:

77. Social Safeguards and Gender

- (i) Ensure subprojects conform to the agreed subproject selection criteria for the project;

- (ii) Review and finalize subproject involuntary resettlement and indigenous people category;
- (iii) Oversee preparation of resettlement plans, DDRs, and indigenous people plans (IPPs); confirm existing resettlement plans, DDRs, and IPPs are updated based on detailed designs, and that new subproject resettlement plans, DDRs are prepared in accordance with the resettlement framework and IPPF prepared for the project;
- (iv) Liaise with district administration for land acquisition, transfers; ensuring land availability;
- (v) Ensure that resettlement plans, DDRs, and IPPs are included in the bidding documents and civil works contracts;
- (vi) Provide oversight on social safeguard management aspects of subprojects and facilitate and follow-up to ensure that any delays in land procurement are addressed;
- (vii) Ensure and monitor the provision in the contract to include the indigenous people to benefit from the facilities constructed under the project;
- (viii) Facilitate and ensure compliance with all government rules and regulations regarding no objection certificates, third party certificates for negotiated settlement or donation, land ownership, and transfer details for each site, as relevant;
- (ix) Supervise and guide the zonal PIUs and city level PIUs to properly carry out the social safeguard monitoring;
- (x) Review, monitor, and evaluate the effectiveness with which the resettlement plans, IPPs, and provisions of DDRs are implemented, and recommend corrective actions to be taken as necessary;
- (xi) Consolidate monthly social safeguard and gender monitoring reports from PIUs and the CMSCs and submit semi-annual social safeguard monitoring reports to ADB;
- (xii) Ensure timely disclosure of final resettlement plans, DDRs, and IPPs in locations and form accessible to the public and affected persons;
- (xiii) Address any grievances brought about through the grievance redress mechanism promptly;
- (xiv) Oversee the assessment of training needs of affected persons and vulnerable persons by PIUs and/or PMCBC, coordinate training activities and convergence with the livelihood programs of the government;
- (xv) Ensure effective implementation of GRM at all levels;
- (xvi) Coordinate database management for social safeguards implementation and monitoring;
- (xvii) Coordinate public awareness campaigns by the PIUs including resettlement provisions with the help of print and electronic media; and
- (xviii) Serve as Gender Focal Point at PMU, which would involve overseeing - with the support of PMCBC, the implementation, monitoring and reporting on the GESI action plan.

78. The PMU is being supported by three institutional consultants under the supervision and control of project director, PMU: (i) the PMCBC is supporting the PMU; (ii) 2 CMSC are supporting the 2 zonal PIUs and town-level PIUs; and (iii) community awareness and public participation (CAPP) Consultants, will support the zonal PIUs and town-level PIUs.

79. **Zonal Project implementation units.** There are 2 zonal level PIUs at Jaipur and Jodhpur. Under each zonal PIU, there are city/town level PIUs, for ease of day-to-day

monitoring and management at local level. The Additional Chief Engineer at each Zonal PIU is serving as the Nodal Officer, Safeguards and Gender. Each Zonal PIU have an assistant safeguards officer (ASO Environmental and Social Safeguards) who is assisting PMU project officer (environment/social) in implementation of the environmental/social safeguards and GESI Action Plan in PIUs under its jurisdiction. Zonal PIUs will undertake internal monitoring and supervision and record observations throughout the project period to ensure that the safeguards and mitigation measures are provided as intended.

80. The zonal level ASO will oversee safeguards implementation by the city/town level PIUs, coordinate public consultations, information disclosure, regulatory clearances and approvals, implementation of resettlement plans, EMP implementation, and grievance redressal.

81. The Zonal PIUs will oversee and support social safeguards and gender equality and social inclusion action plan implementation by the PIUs at town/city level, through the following key tasks:

- (i) fill up involuntary resettlement and indigenous people impact checklist and classify the project;
- (ii) supervise CMSC to coordinate with PIUs and safeguards field staff for conduct census and socio-economic surveys, detailed measurement surveys, and verification surveys of affected persons, conduct consultations with affected persons, finalize the list of affected persons, prepare and/or update the resettlement plan, DDR, RIPP/IPP with the assistance of CMSC and submit to PMU for review and approval and submission to ADB;
- (iii) supervise PIUs to inform affected persons about (a) the project cut-off date; (b) public notice for the schedule of land acquisition and/or occupation; (c) entitlement matrix; and (d) compensation packages against different categories of loss and a tentative schedule of land clearing and/or acquisition for the start of civil works activities;
- (iv) coordinate valuation of assets, such as land and trees of various species. Finalize compensation packages based on proper due diligence and assessment;
- (v) facilitate land acquisition and compensation processes in consultation with the district administration; coordinate, supervise, and monitor the disbursement of compensation;
- (vi) Support PIUs to obtain no objection certificates, land documents, and third-party certifications as required for the subproject, in coordination with PIUs;
- (vii) support PMU to include resettlement plans, IPPs, RIPPs and DDRs in bidding documents and civil works contracts;
- (viii) guide PIUs to oversee implementation of avoidance and mitigation measures in the resettlement plans, DDRs, RIPPs and IPPs by contractors, including compliance with all government rules and regulations; take necessary action for obtaining ROW;
- (ix) guide and monitor PIUs to oversee resettlement plans, DDR, RIPP and IPP, and gender equality and social inclusion action plan implementation and maintenance of data for monitoring by contractors;
- (x) ensure listing of town wise BPL households;
- (xi) assist in conducting needs assessment to list skills relevant to the sector;
- (xii) assist to identify participants for livelihood and skilling training for women and members of other vulnerable groups;

- (xiii) ensure that the project maintains sex disaggregated data on staff, consultants, construction workforce participation, labor and project related trainings;
- (xiv) ensure that gender focal points are nominated in town level PIUs;
- (xv) ensure and monitor the provision in the contract to include the indigenous people to benefit from the facilities constructed under the project;
- (xvi) to ensure that corrective actions are taken when necessary to ensure compliance with SPS and loan covenants;
- (xvii) submit monthly social monitoring reports to PMU;
- (xviii) guide PIUs to conduct continuous public consultation and awareness;
- (xix) address any grievances brought about through the grievance redress mechanism promptly;
- (xx) organize an induction course for the training of contractors, preparing them on RPs, DDR, IPP, and gender equality and social inclusion action plan implementation, social safeguard, and gender monitoring requirements related to mitigation measures, grievance redress mechanism and on taking immediate action to remedy unexpected adverse impacts or ineffective mitigation measures found during implementation;
- (xxi) liaise with the district administration, and line departments for dovetailing government's schemes for income generation and development programs for affected people, as and when required; and
- (xxii) assist in the implementation, monitoring, and reporting progress of gender equality and social inclusion action plan.

82. Town/City Level Project Implementation Unit. The town-level PIUs is responsible for the quality of works executed under the project and are being guided by the zonal PIUs. The city/town PIUs is also responsible for implementation of the IEE/resettlement plan/IPP/RIPP/GESI action plan. The town-level PIUs is headed by a project manager (Superintendent Engineer/executive engineer or assistant engineer) and supported by CMSC field staff. Environment specialist of CMSC assisting PIU in implementation of environmental safeguard. Social and gender specialist of CMSC are assisting PIU in implementation of social safeguard and GESI related tasks. At each PIU, the assistant project manager have given additional responsibilities of safeguard tasks and he is designated as SSO. The SSO is being assisted by the social and gender specialist and environment Specialist of CMSC in reviewing updated/revised IEEs, conducting surveys for updating of resettlement plan/due diligence report, public consultation and disclosure, assessment of entitlement and computation of compensation other than those covered under the RFCTLARRA, 2013, etc. The SSO, with the support of CMSC Social safeguards and Gender Specialist and CMSC field support staff, will assist Zonal ASO and PMU project officer (social) in implementation of the following key tasks. They will also be responsible for coordination of field level activities related to safeguards conducted by the DBO contractor and CMSC. Key role and tasks of town/city level PIU will be:

- (i) Provide field data to fill up IR/IP impact checklist and classify the project;
- (ii) Conduct census and socio-economic surveys, detailed measurement surveys, and verification surveys of affected persons, conduct consultations with affected persons, prepare list of affected persons, provide all data required to prepare/update resettlement plans/DDRs/RIPPs/IPPs with the assistance of CMSC field support, and ensure updated information is submitted to zonal PIU for preparation/updating of documents with CMSC and DBO contractor's support;
- (iii) Inform affected persons about tentative schedule of land acquisition/occupation, entitlement matrix and compensation packages against different categories of loss, and cut-off date;

- (iv) Coordinate valuation of assets, such as land, trees of various species, etc. Based on proper due diligence and assessment, prepare compensation packages;
- (v) Coordinate, supervise and monitor disbursement of compensation;
- (vi) Obtain no objection certificates (NOCs), land documents, third party certifications as required for the subproject;
- (vii) Support Zonal PIUs to prepare/update RPs/RIPPs/PPs/DDR;
- (viii) Oversee day-to-day implementation of impact avoidance and mitigation measures in resettlement plans/DDR/RIPP/PP and EMP by contractors, including compliance with all government rules and regulations particularly health and safety, take necessary action for obtaining ROW;
- (ix) Oversee maintenance of data for monitoring, by consultants and contractors;
- (x) Implement corrective actions when necessary to ensure no adverse social impacts;
- (xi) Submit monthly social monitoring reports to zonal PIU;
- (xii) Conduct continuous public consultation and awareness;
- (xiii) Set up GRM at field/site/PIU level and ensure it is fully functional. Address any grievances brought about through the grievance redress mechanism in a timely manner;
- (xiv) Ensure that induction course for the training of contractors is conducted regularly. Prepare contractors (with consultants' support) on resettlement plans/DDR/RIPP/PP/GAP implementation, social safeguard and gender monitoring requirements related to mitigation measures, health and safety and on taking immediate action to remedy unexpected adverse impacts or ineffective mitigation measures found during the course of implementation;
- (xv) Liaise with the District Administration and line departments for dovetailing Government's schemes for income generation and development programs for affected persons, as and when required;
- (xvi) Supervise the work of all consultants at town level (CMSC, CAPPC).
- (xvii) Undertake day-to-day implementation of final resettlement plans and GESI action plan;
- (xviii) Provide field level information required to prepare periodic safeguard monitoring reports in a format acceptable to ADB and quarterly GESI action plan updates in the format provided in PAM;
- (xix) Ensure relevant data on implementation of GESI action plan is collected and a gender-sensitive communication strategy and information, education and communication (IEC) materials are designed, illustrating key social and behavioural messages related to hygiene, sanitation, and health jointly with the communication specialist and in accordance with the GESI action plan; and
- (xx) Extend support in carrying out awareness campaigns in project towns.

83. **Design-build-operate Contractor.** The contractor is responsible for providing final design (including pipe alignments) to the supervision consultant for finalization/updating of resettlement and indigenous peoples plan. The contractor appointed an environment, health and safety (EHS) engineer who will be responsible on a day-to-day basis for (i) ensuring implementation of EMP, (ii) coordinating with the town-level PIUs and environment specialists of

project consultant teams; (iii) community liaison,⁴⁶ consultations with interested/affected people, (iv) field-level grievance redress; and (iv) reporting.

84. The contractor will be required to submit to RUDSICO, for review and approval, a site-specific environmental management plan (SEMP) including (i) proposed sites or locations for construction work camps, storage areas, hauling roads, lay down areas, disposal areas for solid and hazardous wastes; (ii) specific mitigation measures following the approved EMP; (iii) monitoring program per SEMP; (iv) budget for SEMP implementation. No works can commence prior to approval of SEMP.

85. A copy of the EMP or approved SEMP will be kept on-site during the construction period at all times. Non-compliance with, or any deviation from, the conditions set out in the EMP or SEMP constitutes a failure in compliance and will require corrective actions. The EARF and the IEEs specify responsibilities in EMP implementation during design, construction and operation and maintenance (O&M) phases.

86. The DBO Contractor also have a dedicated social outreach team (SOT) and designated social supervisor, who will hold a Master's degree in social science and would have at least 5 years of experience in resettlement planning and implementation and engage with the PIU, CAPPC and CMSC on social safeguards, health and safety, and core labor standards. The key role of the Contractor's Social Supervisor related to social safeguards will be to:

- (i) Work in close coordination with the PIU, CMSC and PMCBC engineers and social safeguards personnel to finalize detailed design keeping the safeguard principles adopted for the project in view;
- (ii) Ensure that all design-related measures (e.g., special considerations for the vulnerable related to facility locations or design, mitigation measures for affected persons etc.), are integrated into project designs before approval;
- (iii) Conduct joint walk-throughs with PIU, design engineers and social safeguards personnel of CMSC in sites/sections ready for implementation; identify the need for detailed measurement surveys, and support CMSC to jointly conduct detailed measurement surveys and census surveys to arrive at the final inventory of loss;
- (iv) Support project consultants in updating the draft resettlement plan/due diligence report/IPP/RIPP for submission to PIU/PMU and ADB for review and approval;
- (v) Ensure strict adherence to agreed impact avoidance and mitigation measures in the resettlement plan/DDR/RIPP/IPP during implementation;
- (vi) Assist with grievance redressal and ensure recording, reporting and follow-up for resolution of all grievances received; and
- (vii) Submit monthly progress reports including safeguards, health and safety and gender-disaggregated data as required for monitoring.

87. The resettlement plans /IPPs/RIPPs are to be included in bidding and contract documents and verified by the PIUs and PMU. All contractor also designate an Environment, Health and Safety (EHS) supervisor to ensure implementation of EMP/resettlement plan social safeguard provisions in the agreed resettlement framework for the Project during civil works and O&M, who will also have the responsibility for communication with the public under the guidance

⁴⁶ Reasonable size social outreach team (SOT) to be appointed by contractor to facilitate community liaison, consultations and R&R implementation (including resolution of grievances). Requirement of SOT is part of bid document.

of PMU/PIUs and grievance registration. Contractors are to carry out all mitigation and monitoring measures outlined in their contract.

88. The PMU and PIUs will ensure that bidding and contract documents include specific provisions requiring contractors to comply with: (i) all applicable labor laws and core labor standards on (a) prohibition of child labor as defined in national legislation for construction and maintenance activities; (b) equal pay for equal work of equal value regardless of gender, ethnicity, or caste; and (c) elimination of forced labor; and with (ii) the requirement to disseminate information on sexually transmitted diseases, including HIV/AIDS, to employees and local communities surrounding the project sites.

Figure 18: Safeguard Organogram – RSTDSP

*Zonal PIU will be led by a nodal officer of the rank of assistant chief engineer who will also be the nodal person for safeguards and gender compliances in project implementation by town level PIUs. S/he will be supported by ASO in execution of these responsibilities.

89. Further details on responsibilities of different agencies for social safeguard implementation during different project phases are given in Table 19 below.

Table 19: Institutional Roles and Responsibilities

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
PMU Project Officer; (Social),	(i) Review IR/IP impact categorization checklists, and assign categorization based on SPS 2009 (ii) Review and approve RPs/RIPPs/DDR/IPP and submit to ADB for approval and disclosure in ADB website (iv) Ensure approved RPs/RIPPs/DDR/IPP are	(i) Over-all social safeguards compliance of the project (ii) Monitor and ensure compliance of RPs/RIPPs/IPP as well as any other provisions and conditions. (iii) Review monthly monitoring report. (iv) Prepare and submit	(i) Compliance monitoring to review the social safeguard performance of project component, if required and as specified in RPs/RIPPs/IPP. (ii) Coordinate for external monitoring reports if necessary.

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
	disclosed in RSTDSP/PMU websites and summary posted in public areas accessible and understandable by local people. (v) Ensure social safeguard documents are included in bid documents and contracts (vi) Organize an orientation workshop for PMU, PIU, ULB and all staff involved in project implementation on ADB SPS, relevant national and/or state laws, RP/IPP preparation implementation and monitoring, timely payment of compensation before start of civil work, mitigation measures, public relations and ongoing and meaningful consultations, grievance redress, etc. (vii) Assist in timely redressal of grievances (viii) Organize an induction course for the training of contractors on social safeguards. (ix) Ensure compliance with ADB SPS and all government rules and regulations regarding impacts to IP (scheduled tribe) community. (x) Assist PMU, PIUs to document and develop good practices case studies as per the RP implementation process and schedule. (xi) Monitor the grievance redress process and ensure grievances redress within prescribed timeframe.	to ADB semi-annual monitoring reports. (v) If necessary, prepare Corrective Action Plan and ensure implementation of corrective actions to ensure no impacts are mitigated; (vi) Organize capacity building programs on social safeguards (vii) Coordinate with national and state level government agencies (viii) Assist in addressing any grievances brought about through the Grievance Redress Mechanism in a timely manner as per the GRM (ix) Coordinate PIUs, consultants and contractors on mitigation measures involving the community and affected persons and ensure that social concerns and suggestions are incorporated and implemented.	
Zonal PIU, Assistant Safeguard Officer	(i) Coordinate updating/preparation of RPs/RIPPs/IPP/DDR with CMSC's support and ensure the documents are included in bid documents and contract	(i) guide PIUs to oversee implementation of avoidance and mitigation measures in by contractors. (ii) Take necessary	(i) Conducting social monitoring, as specified in the RPs/RIPPs/IPP.

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
	agreements. (ii) Disclose approved RPs/RIPPs/IPP/DDR. (iii) Obtain all necessary agreements, sale deeds, transfers of title, consents/ NOCs, third party certification etc. as applicable. Ensure compliance to the provisions and conditions in such documents. (iv) Guide town/city level PIUs in RP/RIPP/IPP implementation including payment of compensation prior to civil work, encumbrance free sites for construction work, dissemination of information/notice prior to start of construction etc. (v) Organize an induction course for the training of contractors, preparing them on site situations and local sensitivities, scheduling of work as per local community's requirements, if any, monitoring requirements and taking immediate actions to mitigate unanticipated impacts. (vi) Consolidate monthly social and GESI monitoring reports by town-level PIUs and submit to PMU; (vii) Continued consultation activities with stakeholders.	action for obtaining rights of way; (iii) Oversee implementation of RPs/RIPPs/IPP., (iv) Take corrective actions when necessary. (v) Ensure monthly reports contain relevant sections on social safeguards implementation. Consolidate and submit monthly social monitoring reports to PMU, (vi) Conduct public consultation and awareness raising during the entire project cycle. (vii) Formulate timebound corrective actions for non-compliances (viii) Address any grievances brought about through the grievance redress mechanism in a timely manner as per the GRM.	
Town/City Level PIU Safeguard and Safety Officer	(i) Provide necessary data for IR/IP categorization. (ii) Conduct sample socio-economic surveys, data analysis during RP/RIPP/IPP preparation and detailed measurement surveys for RP/RIPP preparation and updating; submit updated information to zonal PIUs for	(i) Oversee day-to-day implementation of impact avoidance and mitigation measures proposed RPs/DDRs/IPPs including compliance with all government rules and regulations. (ii) Take corrective	(i) Ensure coordination with the stakeholders including APs/IP to ensure project benefits as envisaged. (ii) Prepare case studies/ good practices for the project.

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
	updating of RPs/DDR/RIPPs with CMSC's support. (iii) Liaise with affected persons and district administration regarding land acquisition, payment of compensation. (iv) Coordination with departments/individuals regarding consent/NOCs/land records/agreements/transfers and third-party certification.	actions when necessary to ensure no adverse social impacts. (iii) Submit monthly monitoring reports with social safeguards compliance to PMU. (iv) Conduct public consultation and awareness activities throughout the project cycle. (v) Address any grievances brought about through the grievance redress mechanism in a timely manner	
Consultants – 1.PMCBC-Social Safeguard Specialist – 1	(i) Assist PMU to review IR/IP checklists and categorization; (ii) Assist PMU to review and ensure RPs/RIPPs/IPPs are prepared/updated based on detailed design as per agreed RF/IPPF and submit to PMU for approval (iii) Assist PMU/PIUs in coordination with different departments, obtaining all necessary inter-departmental transfers, permits, consents, NOCs, etc. Ensure provisions and conditions are incorporated in the RPs/RIPPs/IPPs and detailed design documents. (iii) Assist in ensuring RPs/RIPPs/IPPs are included in bid documents and contract agreements. Assist in determining adequacy of cost for RPs/RIPPs/IPPs implementation. (iv) Assist in addressing any grievance. (v) Assist PMU in setting up monitoring systems for social safeguards and GESI. (vi) Assist PMU in the design	(i) Assist PMU to monitor RP/RIPP/IPP implementation as per the approved document. (ii) Recommend corrective action measures for non-compliance by contractors, if any. (iii) Assist in the review of monitoring reports submitted by contractors. (iv) Assist in the compilation / preparation of semi-annual social monitoring reports. (v) Assist in the preparation of quarterly progress reports, including reporting on social safeguards and GESI implementation. (vi) Assist PMU to supervise and conduct public consultation and awareness activities throughout the project cycle. (vi) Assist in addressing	(i) Assist PMU in monitoring of socioeconomic status of affected persons, post RP/RIPP implementation.

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
	and conduct training and capacity building programs and workshops. (vii) Assist PMU to guide all project entities (zonal PIUs, PIUs, CMSCs) in social safeguards and GESI implementation, monitoring and reporting.	any grievances brought about through the Grievance Redress Mechanism in a timely manner.	
2.CMSC-2 Social Safeguards Professional and field support staff	(i) Assist zonal PIUs and town/city level PIUs to prepare/update RPs based on detailed design and detailed measurement surveys; (ii) Guide CMSC field staff and contractor's social supervisor to conduct joint surveys and collect all information and conduct site-specific consultations required for preparing/updating RPs/DDR/RIPPs and for preparing IR/IP checklists (iii) Guide CMSC field staff in supporting PIUs to announce cut-off dates, and disclose RPs/RIPPs to affected persons and implement RPs/RIPPs (iv) Support zonal and town-level PIUs in RP/RIPP and GESI implementation, monitoring and reporting, and grievance resolution and reporting.	(i) Support zonal PIUs to ensure (through field staff) that PIUs and contractors implement impact avoidance and mitigation measures; (ii) Assist town level PIUs (through field staff) to ensure RPs/RIPPs are implemented and all compensation paid prior to start of civil works (iii) Assist in monitoring and reporting, preparation of quarterly and semi-annual reports. (iv) Assist in grievance resolution and reporting.	(i) Supervise contractors to ensure any land required temporarily during construction, is restored to original condition, post construction. (ii) Assist zonal PIUs in monitoring of socioeconomic status of APs, post RP implementation.
Contractors (Officer)	(i) Review the RPs/RIPPs/IPPs and provide information about changes needed as per revised design and scope of works to PIU/CMSC/PMCBC for final revision of documents. (ii) Identify the need for detailed measurement surveys, and conduct detailed measurement surveys to arrive at the final inventory of loss (iii) Support project consultants in updating the	(i) Ensure compensation is paid prior to start of work. Implement EMP. (ii) Implement corrective actions if necessary. (iii) Prepare and submit monitoring reports including pictures to PIU (iv) Brief staff, employees, and labor about the requirements of the good engineering practices to avoid / mitigate any impacts.	(i) Ensure benefits are availed by citizens as envisaged. (ii) Request certification from PIU

Responsible Agency	Responsibility		
	Pre-Construction Stage	Construction Stage	Post-Construction
	draft resettlement plan / due diligence report for submission to PIU/PMU and ADB for review and approval. (iv) Assist with grievance redressal and ensure recording, reporting and follow-up for resolution of all grievances received. (v) Assist PIU in disclosing relevant information on social safeguards. (vi) Ensure strict adherence to ADB and government policy on social safeguards.	(v) Bear the costs of any damages/compensation resulting from non-adherence to the provisions RPs/RIPPs/IPPs or written site instructions; (viii) Ensure that PIUs are timely informed of any foreseeable activities related to RP/RIPP/IPP implementation.	

ADB = Asian Development Bank, AP= affected person, CMSC= Construction Management and Supervision Consultant, CAPPCC = community awareness and participation consultant, FGD = focus group discussion, PIU =project implementation unit, IPP= Indigenous people plan, PMCBC = project management and capacity building consultant, PMU =project management unit, RP= resettlement plan, ULB= urban local body.

C. Institutional Capacity and Development

90. RUSIDCO-EAP has experienced project staff for social safeguards, with knowledge and experience of ADB social safeguard policies and their implementation. However, retirement of existing staff during project implementation, transfer of candidates or recruitment/designation of new candidates as safeguards officers at zonal or town level will require training of the new staff and officers who will be involved in project preparation and implementation. The PMCBC Social Safeguard Specialist will be responsible for training the PMU's safeguards officers (environmental and social), and PIUs' engineers and social safeguards officers. The resettlement framework includes indicative training modules on safeguards. The PMCBC will coordinate with PMU and PIUs on specific capacity development program.

- (i) sensitization on ADB's Policies and guidelines on social and indigenous people safeguards (ADB's Safeguard Requirement 2 and 3: Involuntary Resettlement and Indigenous Peoples) including meaningful consultation, GRM and accountability mechanism;
- (ii) introduction to the assessment of involuntary resettlement and indigenous peoples impacts and mitigation measures, including best practices, in the design, construction, operation and maintenance of water supply, sewerage, roads, and drainage subprojects;
- (iii) preparation and review of RPs/RIPPs/IPPs/DDR's based on preliminary design, and updating of the documents based on the final design;
- (iv) improved coordination within nodal departments;
- (v) disbursement of compensation, consultation; and
- (vi) monitoring and reporting requirements.

91. Table 20 provides the indicative training needs assessment. The cost of trainings will be borne under the Project's capacity building program by PMU. The detailed cost and specific

modules will be customized for the available skill set after assessing the capabilities of the target participants and the requirements of the project by the SSS of PMCBC.

Table 20: Indicative Training Needs Assessment

Description	Target Participants and Venue	Source of Funds
1. Introduction and Sensitization to Social/Resettlement Issues (1 day) - ADB Safeguards Policy Statement - Government of India and Rajasthan applicable social safeguard acts - Incorporation of social/resettlement components under EMP into the project design and contracts - Monitoring, reporting and corrective action planning	All staff and consultants involved in the project At PMU, Jaipur	PMU cost
2. resettlement plan implementation (2 days; 2 times during implementation with interval of one year in-between) - Roles and responsibilities - resettlement plan components and stages in implementation - Construction schedules and timelines - Public relations - Consultations - Grievance redress - Monitoring and corrective action planning - Reporting and disclosure - Timely documentation	All staff and consultants involved in the subproject All contractors prior to award of contract At each PIU	PMU cost
3. Experiences and best practices sharing (1 day) - Experiences on resettlement plan implementation - Issues and challenges - Best practices followed	All staff and consultants involved in the project All contractors At PMU Jaipur	PMU Cost

ADB = Asian Development Bank, EMP = environmental management plan, PIU = project implementation unit, PMU = project management unit.

D. Implementation Schedule

92. The project will be implemented over a period of 7 years. The resettlement plan implementation schedule will vary from subproject to subproject and in this case it is 4 years. In general, the project implementation will consist of the three major phases, namely project preparation, land acquisition (if required), and rehabilitation of affected persons. In line with the principles laid down in this resettlement framework, the executing agency and implementing agency will ensure that project activities are synchronized between the resettlement plan implementation activities and the subproject implementation. The executing agency and implementing agency will ensure that no physical or economic displacement of affected households will occur until: (i) compensation at full replacement cost has been paid to each displaced person for project components or sections that are ready to be constructed; (ii) other entitlements listed in the resettlement plan are provided to the displaced persons; and (iii) a comprehensive income and livelihood rehabilitation program, supported by adequate budget, is in place to help displaced persons improve, or at least restore, their incomes and livelihoods.

93. All land acquisition, resettlement, and compensation for a subproject will be completed before award of civil works contracts. All land required will be provided free of encumbrances to the contractor prior to handing over of subproject sites and the start of civil works. The implementation of the RIPP will include: (i) identification of cut off date and notification, (ii) verification of losses and extent of impacts, (iii) finalization of entitlements and distribution of identity cards, (iv) consultations with APs on their needs and priorities, and (v) resettlement, provision of compensation and assistance, and restoration for affected persons. However, public consultation and monitoring will be continued activity during the entire duration of the project. The expected implementation schedule for the subproject is given in Table 21.

Table 21: Schedule of RIPP Implementation

Activity	Year-1				Year-2				Year-3				Year-4			
	Q-1	Q-2	Q-3	Q-4	Q-1	Q-2	Q-3	Q-4	Q-1	Q-2	Q-3	Q-4	Q-1	Q-2	Q-3	Q-4
Establishment of PMU and PIUs	♦	♦														
Appointment of PMCBC		♦														
Appointment of CMSC and CAPP		♦		♦												
Briefing of the TLMC on GRC functions	♦	♦														
Census and socio-economic surveys (issuance of ID cards)			♦													
Consultations and disclosure			♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦
Confirmation of government land to be used and transfer from other departments		♦	♦													
Resettlement plan preparation			♦	♦												
Resettlement plan review and approval (PMU and ADB)				♦	♦											
Issue notice to affected persons					♦											
Compensation and resettlement assistance					♦	♦										
Relocation as required					♦	♦	♦									
Skills training as required					♦	♦			♦	♦						
Takeover possession of acquired property							♦	♦	♦							
Internal monitoring			♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦	♦
Handover land to contractors		♦	♦			♦	♦			♦	♦					
Start of civil works			♦													
Rehabilitation of temporarily occupied lands													Immediately after construction			

ADB = Asian Development Bank, GRC = grievance redress committee, CAPP= community awareness and public participation consultant, CMSC= construction and supervision consultant, PIU = project implementation unit, PMCBC = project management and capacity building consultant, PMU = project management unit, SSS = social safeguard specialist, TLMC = town level monitoring committee.

Notes: (i) The start date of census will be the cut-off date for non-titled affected persons. For titled affected persons, the cut-off date is the date Declaration. (ii) The resettlement plan will be updated based on final detailed design and affected person census and surveys. (iii) Endorsement and disclosure of finalized resettlement plans consistent with the resettlement framework to be undertaken.

X. MONITORING AND REPORTING

94. The Resettlement and Indigenes Peoples Plan implementation will be closely monitored (specifically aspects relating to temporary impacts) to provide the PMU with an effective basis for assessing resettlement progress and identifying potential difficulties and problems. Internal monitoring will be undertaken by the PIU (through the assistant safeguard officer) with assistance from the PMU project officer. Monthly progress reports will be prepared and submitted to the PMU. PMU will consolidate the same and will submit semi-annual monitoring reports to the ADB for approval. Refer Sample Monitoring Template in **Appendix 42**.

XI. PRESENT STATUS OF WORK AND DUE DILIGENCE OF PRESENT WORK

95. The contract of this subproject has already been awarded and approval has been given to the contractor for laying of pipeline and allied works in zone 1 and 3. Areas within Zone 1 and 3 are mostly residential situated in the outskirts of the town. Laying of water supply network is yet to start. For sewerage network, town has been divided into two discharge zones namely Zone-1 and Zone-2. Approval has been given to the contractor for laying pipeline works in both the zones. Pipelaying started in Zone 2. Areas within Zone 2 is mostly residential and outskirt areas of the town. Laying of pipeline work in residential and outskirt area started since October 2020, and upto December 2020, 1.87 km pipeline laid along with manhole in zone- 2. No physical works started in the permanent sites designated for construction of subproject components other than pipe laying (WTP, STP, SPS, CRMC, MCC, CCC and CWR).

96. Due diligence/field visit/transect walk were undertaken by a team including Safeguard staff of CMSC/PMCBC, PIU and, Project contractor in all the areas where pipeline works has been laid or to be laid. It was envisaged that all the areas where pipeline works were allowed are mostly residential and outskirt areas of the town and are part of low-density areas in terms of commercial activity. No Involuntary resettlement impact was envisaged during transect walk. Social outreach team of the project contractor provided advance information to the households prior to pipelaying works and works are being executed after incorporating the suggestion from households, if any. The details of the proposed alignment of the sewerage pipeline with photographs of the roads provided in **Appendix 43**.

XII. NEXT STEPS

97. Measures recommended in draft RIPP is now updated and attached in **Appendix 44**. During updating of RIPP, following points/issues were identified that will be updated and reported to ADB through social monitoring report.

- (i) Presently DBO Contractor is providing alignment zone wise. As per contract, contractor should have to carry out the execution activities in all respects for that particular zones/DMA's and after completing the particular DMA/Zones, contractor shall focus for remaining zones/DMA's on priority basis. Anticipating the possibility of changed alignment after trial pit, 100% socio economic survey has been done for all the vendors/hawkers in both side of the road where water supply and sewerage networks pipeline to be laid. After finalization of exact alignment, joint re-confirmatory survey will be conducted by the officials of PIU, CMSC and contractor to finalize the list of APs likely to be impacted due to civil works. While finalizing the alignment, efforts will be made to avoid the impacts, and accordingly, the affected persons present in that particular section will be included in the mitigated list having no impacts. Those who will be impacted will be paid assistance as per agreed entitlement matrix. All the progress will be reported to ADB through bi-annual social monitoring report. SIP is still under progress, if any changes will be encountered, due diligence will be conducted and same will be reported to ADB.
- (ii) Mitigation measures as proposed in this draft RIPP will be taken by the contractor and robust monitoring plan will put in place by the PIU and PMU to ensure its compliance. All safety measures will be taken during civil work.
- (iii) Measures undertaken for mitigating impacts on permanent shops/commercial establishments will be reported separately in bi-annual social monitoring report. During implementation if impact on such shops are identified, impact assessment and survey will be carried-out and compensation will be paid as per resettlement framework and entitlement matrix of the project.
- (iv) Meaningful consultation will be carried out throughout the project cycle and same will be reported to ADB through bi-annual social monitoring report.

Appendix 1: Letter of Confirmation for Providing Water Supply in 6 Villages along Transmission Line

F3(301)(50)RUIDP/PHU/PH-IV/WS/GENERAL/ 79 6/

Dated 24.08.2017

**Chief Engineer (Project)
PHED, Jodhpur**

Sub: Solution of drinking water problem in Abu road town and nearby villages District Sirahi.

Ref: Your office letter No. 5371-74 dated 18.07.2017.

In reference to above cited subject and referred letter, it is to inform that Detailed Project Report (DPR) of Abu road is being prepared by consultant considering Bhainsa Singh Dam as surface source for water. The proposed component under this project will be Intake, Water Treatment Plant, Pump House and transmission & distribution network for Abu Road town. Since no other source is available in the area, the treated water shall be made available for envisaged six nearby villages from this project at the water treatment plant further provision for execution of regional water supply scheme for these villages will have to be taken up by PHED.

You are requested to kindly direct concern officer to inform the water demand for these villages.

(Akhil Kumar Jain)
Chief Engineer, RUIDP

each water treatment plant, quality of water produced, pump operations, electric parameters and Non Revenue water (NRW), manholes data, overspill of sewers, condition of water and sewer pipeline etc.

Contractor shall also submit the activity wise Monthly Reports for reviewing by the employer. Progress of all activities will be reviewed on weekly basis for design part. Progress will be reviewed based on the progress. Reports on Monthly basis during construction part and daily basis during operations part.

6.2.6 WATER DEMAND & AVAILABILITY

Overall drinking water supply requirements are as follows:-

Table 5: Population, Water Demand and Availability

Year	Stage	Population	Consumer End Water Demand	Total Raw Water Demand (Urban+Rural)	Raw Water (Dam+TWs) Available	Balsah Singh Dam	Ex. (TWs+OW) + Pr. Tw
(MLD)							
2021	Base Year	63,554	8.60	10.97	10.97	10.0	5.90
2036	Intermediate Year	76,212	10.30	13.15	13.15	10.0	5.90
2051	Ultimate Year	89,742	12.20	15.56	15.56	10.0	5.90

Demand of following 6 periferal villages are also added in the total demand from Bhaisa Singh Dam:-

Table 6: Rural Population and Water Demand

S. No.	Name of Village	Population Projection			Demand @ 40 LPD (KLD) at consumer end			Raw water Demand (KLD)		
		2021	2036	2051	2021	2036	2051	2021	2036	2051
1	2	4	5	6	7	8	9	13	14	15
1	Manpur	1237	1483	1746	49.50	59.32	69.84	56.30	67.40	79.40
2	Tartoli	1521	1824	2148	60.60	72.96	85.92	69.10	82.80	97.60
3	Khadal	1885	2260	2662	75.40	90.40	106.48	85.70	102.70	121.00
4	Umarani	1232	1478	1740	49.30	59.12	69.60	56.00	67.20	79.10
5	Kul	2483	2977	3506	99.30	119.08	140.24	112.80	135.30	159.40
6	Santpur	10500	12592	14827	420.00	503.68	593.08	477.30	572.40	674.00
	Total	18858	22614	26629	754.30	904.56	1066.16	867.20	1027.90	1210.50

Note - For village demand water shall be made available at WTP pump house. Two slots will be left for the pumps of village demand. These pumps shall be installed and maintained by the line agency. PWD for rural supply

6.2.7 INTAKE-CUM-RAW WATER PUMPING STATION

The scope of work at Intake include the Intake structure, approach bridge, coffer dam, piping, valves and pumping plant and machinery, along with the associated power system, includes design, manufacture and testing at manufacturer's works, packing for shipment, delivery to the site, supply, unloading, storing, complete erection, setting to work, installing, pre-commissioning and commissioning tests, trial runs, commissioning of all related mechanical, electrical, instrumentation and SCADA works. Intake well proposed at Bhaisa Singh Dam. The water will be supplied through transmission main to proposed WTP.

6.2.8 WTP

Design, Construction, supplying, installation, testing, trial run and successful commissioning of new Rapid Gravity Filter Water Treatment Plant including but not limited to all relevant Civil, Pipeline, Electro-Mechanical and Instrumentation SCADA system and synchronization of SCADA enabled devices and equipments with GIS installed in the Water Treatment Plant including CVPS and pumping system. Along with all ancillary civil works.

**न्यास की तैतीसवीं बैठक दिनांक 25.08.2020
का बैठक कार्यवाही विवरण**

नगर सुधार न्यास आबू की तैतीसवीं बैठक दिनांक 25.08.2020 को प्रातः 10:30 बजे अध्यक्ष (श्रीमान् जिला कलेक्टर) नगर सुधार न्यास आबू की अध्यक्षता में कलेक्टर कार्यालय सभा भवन, सिराही में आहुत की गई जिसमें निम्न न्यासी/अधिकारीगण उपस्थित हुए :-

1. श्री भगवती प्रसाद कलाल, अध्यक्ष (जिला कलेक्टर), नगर सुधार न्यास, आबू।
2. श्री कुशल कुमार कोठारी, सचिव, नगर सुधार न्यास, आबू।
3. श्री के. एल. मेघवाल, अधिक्षण अभियंता, जो.वि.वि.नि.लि. सिराही।
4. श्री गोविन्द नारायण माथुर अधिक्षण अभियंता, जन स्वास्थ्य अभियंत्रिकी विभाग, सिराही।
5. श्री अनिल कुमार माथुर, अधिक्षण अभियंता, सार्वजनिक निर्माण विभाग, सिराही।
6. श्री भूपेन्द्र कुमार, वरिष्ठ नगर नियोजक, जोधपुर।
7. श्री आर. सी. बराडा, अधिशाषी अभियंता, सार्वजनिक निर्माण विभाग, आबूरोड एवं नगर सुधार न्यास, आबू।
8. श्री नवोदित सिंह, सहायक अभियंता, नगरपालिका, आबूपर्वत।

बैठक के प्रारम्भ में सदस्य सचिव द्वारा अध्यक्ष महोदय एवं सभी सदस्यगणों का स्वागत करते हुये अध्यक्ष महोदय की अनुमति से बैठक एजेण्डा की जानकारी दी एवं बैठक में एजेण्डा के बिन्दु वार चर्चा कर निम्न प्रस्ताव पारित किये गये :-

[Handwritten signature]

7. अन्य विषय अध्यक्ष महोदय की अनुमति से

- a) अधिशाषी अभियंता, आर.यू.आई.डी., पी.आई.यू., आबूरोड के पत्र क्रमांक EE/RUIDP/Phase-IV/aburoad/2020/118 dated 20-08-2020 के द्वारा सीवररेज एवं वाटर सप्लाई प्रोजेक्ट्स के अन्तर्गत सी.डब्ल्यू.आर. एण्ड पंप हाउस ग्राम कुई के ख.नं. 278/2 की क्षेत्रफल 1147.00 वर्गमीटर भूमि आवंटन हेतु निवेदन किया गया। पत्र के अंकित बिन्दुओं पर चर्चा की गई। इस संबंध में श्रीमान वरिष्ठ नगर नियोजक, से भूमि आवंटन योग्य होने की टिप्पणी प्राप्त होने के पश्चात सैद्धान्तिक रूप से सहमति दी गई।
- b) आंगनबाड़ी केन्द्रों को भूमि आवंटन किये जाने हेतु पूर्व बैठक दिनांक 06.03.2019 के प्रस्ताव संख्या 6 में वरिष्ठ नगर नियोजक से राय प्राप्त की जाकर आगामी बैठक में रखे जाने का निर्णय लिया गया था। जिस क्रम में वरिष्ठ नगर नियोजक जोधपुर से राय प्राप्त की जा चुकी है। अतः सर्व सम्मति से चर्चा पश्चात आंगनबाड़ी केन्द्रों को भूमि आवंटन हेतु सक्षम स्वीकृति हेतु प्रकरण राज्य सरकार को प्रेषित किये जाने का निर्णय लिया गया।

अंत में बैठक सघन्यवाद समाप्त की गई।

Appendix 31: Copy of leaflet distributed prior to start of survey works and photographs

राजस्थान मध्यम नगर विकास क्षेत्र परियोजना (RSTDSP), RUIDP चरण- IV

परियोजना का नाम – आबूरोड शहर में जलप्रदाय योजना के सुदृढीकरण एवं जल-मल निस्तारण (सीवररेज) प्रणाली के विकास का कार्य (Aburoad Water supply and Sewerage works)

परियोजना के उद्देश्य

आपके शहर में जल आपूर्ति पेयजल और सीवररेज परियोजना को शुरू किया जा रहा है। इस परियोजना के सफलता पूर्वक संचालन के लिए आप सब शहरवासियों से सहायता की आवश्यकता है। इस योजना के संचालन से शहर के लोगों को पेयजल और सीवररेज से सम्बंधित समस्याओं का निपटारा होगा और पूरे शहर को नियमित रूप से प्रति दिन पर्याप्त मात्रा में स्वच्छ पेयजल उपलब्ध होगा। सीवररेज परियोजना से पूरे शहर को स्वच्छता के नये आयाम मिलेंगे और पूरा शहर साफ-सुथरा और स्वच्छ नजर आयेगा।

जलप्रदाय योजना

(अ) वर्तमान क्षमताओं का पूर्ण उपयोग करना तथा जहाँ भी आवश्यक हो उत्पादन एवं वितरण व्यवस्था में अभिवृद्धि।
 (ब) परियोजना के तहत वितरण में वृद्धि की जायेगी।

सीवररेज कार्य

(अ) पर्यावरण की गुणवत्ता में सुधार तथा स्वच्छता के लिए योजना का क्रियान्वयन करना जिसके तहत सीवररेज की विस्तृत प्रणाली स्थापित की जाएगी तथा घरों से होने वाले सभी प्रकार के निस्तारित जल को सीवर लाइन से जोड़ा जायेगा।
 (ब) सीवररेज ट्रीटमेन्ट (जल मल निस्तारण) संयंत्र का निर्माण किया जायेगा।

परियोजना घटक एवं स्थार के प्रस्ताव

जलप्रदाय योजना

(अ) आवश्यक जल परिवहन पाइप लाइने व वितरण पाइप लाइनों के कार्य (लगभग **195 km** नयी पाइप लाइन डालना)।
 (ब) **10** एमएलडी घाटर ट्रीटमेन्ट प्लांट (जल शोधन संयंत्र)।
 (स) जलाशयों का रखरखाव (प्रतिस्थापन एवं निर्माण)।
 (द) पानी के अपव्यय को नियंत्रित करने हेतु जोन वार्डज ब्लक मीटरिंग व्यवस्था।
 (इ) थरेलू मीटर सहित कनेक्शन (प्रतिस्थापन लगभग 12800 नये)।

सीवररेज कार्य

(अ) लगभग 105 km सीवर लाइन नेटवर्क।
 (ब) 6.9 & 2.5 mld एमएलडी सीवररेज ट्रीटमेन्ट प्लांट (जल मल निस्तारण संयंत्र) लगाए जाएंगे।
 (स) एस पी एस (सीवररेज पंप स्टेशन) का निर्माण।

परियोजना की अनुमानित लागत – राशि रुपये 283.77 करोड़

निर्माण कार्य के दौरान संभावित अल्पावधि प्रभाव :-
 जो लोग रोड के किनारे थड़ी-ठेला फल-सब्जी चाय कि थड़ी फेरी अस्थायी दुकान लगाकर अपना व्यवसाय कर जीवनयापन करते हैं, कार्य के सफल क्रियान्वयन के लिए उन लोगों को अल्पावधि के लिए अन्यत्र स्थानान्तरित की आवश्यकता पड़ेगी। यदि व्यवसायियों को किसी भी तरह की हानि पहुँचेगी तो उन्हें प्रभावित मानते हुये एडीबी / राजस्थान सरकार के मानकों के अनुसार उचित क्षतिपूर्ति का पट्टा पट्टा किया जायेगा। इस कार्य हेतु सर्वे कार्य दिनांक 02/02/2021 से शुरू किया जा रहा है जिसमें हम आपसे सहायता की अपेक्षा करते हैं।

हमारी सहायता करें – स्वयं की सहायता करें

राजस्थान मध्यम नगर विकास क्षेत्र परियोजना (RSTDSP), RUIDP चरण- IV

जल का संरक्षण बढ़ायेगा जीवन। गंदगी एक प्रयंकर बीमारी है। इससे घरी कदमो है।

Transcript

Name of the Project- Abu-road Water supply and Sewerage works

Objectives of the Project - A project is going to start in your city/town for providing drinking water and sewerage facilities and participation of all residents is required for success of the project. Under the project, pure drinking water shall be provided as per daily basis with sufficient amount in entire city and sewerage facility shall be improved in entire city.

Water supply

1. Complete utilization of present capacities and improvement in production and distribution system as and where possible.
2. Distribution of drinking water shall be improved.

Sewerage Works

1. Sewerage treatment plant shall be constructed
2. Implementation of program for ensuring qualitative improvement in environment and effective and large sewerage system shall be established. All drainages and waste water shall be linked with sewerage system.

Project components and proposal of reforms

Water supply

1. Pipeline laying works for water transmission and distribution (195 km new pipeline)
2. Construction of water treatment plant with capacity of 10 MLD
3. Maintenance of water ponds (construction and refurbishment)
4. Zone wise bulk meter system for controlling wastage of drinking water
5. House connection with meter (New connections 12800)

Sewerage works

1. Laying of sewerage network (105 Km)
2. Sewerage treatment Plant with capacity of 6.9 and 2.5 MLD
3. Construction of sewerage pumping stations

Project Cost (expected)- 236.77 crore

Short term impacts during the proposed construction

Some street and mobile vendors are engaged in road side business. Pipe will be laid in such road/s sides and they may be affected temporarily during the proposed construction and may have to move at other place. If any loss of business or livelihood is envisaged, the business owner shall be considered as affected person and compensated as per ADB/GOR process. Survey work is going to start from 2 February 2021 and your cooperation is solicited.

Appendix 32: Photographs of Income Loss Survey

Appendix 33: Consent taken from permanent shopowners

स्थानीय व्यापारियों से सहमति पत्र

आबूटोड शहर में जल प्रदाय योजना सुरक्षीकरण एवं जल मूल निवृत्तारण (सीवेज) प्रणाली के विकास कार्य के सन्दर्भ में स्थानीय व्यवसाय करने वाले लोगों से चर्चा की गयी। चर्चा के दौरान इस बात से अवगत कराया गया कि जब बाजार क्षेत्र में पाइप लाइन का कार्य शुरू होगा तो व्यवसाय पर नकारात्मक प्रभाव नहीं पड़े इस बात को ध्यान में रख कर कार्य सम्पादित होगा।

व्यापारी वर्ग ने यह आश्वासन दिया कि उक्त परियोजना के सफल क्रियान्वयन के लिए उनका पूर्ण सहयोग रहेगा और उक्त अवधि के लिए जो अनुविधा रहेगी उससे हमलोगों को कोई ऐतराज नहीं है। हमलोग इस कार्य के सफल क्रियान्वयन के लिए विभाग के साथ हैं।

Transcript⁴⁷

Consultation was done with local businessmen and it was informed that efforts will be made by the contractor and PIU to avoid impacts during laying of pipeline in market areas. Businessmen ensured that they will provide full support to the department for smooth execution of the project. We are willing to bear temporary inconveniences during execution of work.

⁴⁷ During implementation of work if impact on the permanent shops are identified, impact assessment and survey will be carried-out and compensation will be paid as per entitlement matrix of the project.

Appendix 34: Indigenous Peoples Specific Action Plan Reporting Template

This Indigenous People Specific Action Plan implementation report shall be prepared on a quarterly basis for subprojects which are being implemented in a scheduled area in which RIPPIs prepared. This report will be part of the quarterly progress reports/semi-annual monitoring report and will be submitted by PMC to PMU for onward submission to ADB.

Name of the subproject, Abu Road Water Supply and Wastewater Works

S. No.	Specific Activities	Means of Verification	Responsibility	Timeline	Status/Remarks
1.	Identify and include IP households and localities in coverage area	Baseline data generated from the house service connection survey and secondary data analysis*	Contractor/CMSC/Town level PIU	Year 1	
2.	Proposed benefits to IP households (from the subproject scope/DMF indicators and GESI indicators if applicable) - House service connections (water and sewerage) - Coverage under FSSM (for IP households living in unsewered areas) - Participation of IP in awareness campaigns - Participation of eligible/targeted IP in training programs and internships...	Project documents (subproject scope/DMF indicators and GESI indicators)	Contractor/CMSC/Town level PIU/CAPPC	- Year 5 onwards - Year 5 - Year 1 onwards; - Throughout project duration - Year 1-6	
3.	Type of consultations planned with IP households (stage of project cycle) - Pre-Construction - Construction - Post Construction	Detailed report on consultation in MPR/QPR (as submitted by the project consultants)/Semi-annual social monitoring reports with photographs	CMSC/Town level PIU/CAPPC	Year 1 onwards	

S. No.	Specific Activities	Means of Verification	Responsibility	Timeline	Status/Remarks
	4. Other				
4.	Grievance Redress Mechanism established at different levels	Government order/notice specifying inclusion IP representation in CLC/GRC as described in the project GRM (in case of any indigenous peoples impacts) Report related to project grievance reflected in the monitoring reports of the Project	PMU	Year 1	
Monitoring – Project completion stage					
5.	Endline Survey including assessment of coverage and satisfaction levels of IP households with subproject work completed/ subproject intended benefits vs actual benefits to the IP community	End-line survey report and project completion report (PCR)	CMSC/Town level PIU	Year 6-7	

NOTE: *Census 2011 may not be the sole source. Other reliable sources may be explored such as Town specific Tribal Welfare Department, Municipality

Where applicable, the information provided in the table should be supported by detailed explanatory report, receipts, consultation, photographs and other details.

ADB = Asian Development Bank, CAPPC = Community Awareness and Participation Consultant, CLC = City Level Committee, CMSC = Construction Management and Supervision Consultant, DMF = Design Monitoring Framework, FSSM = Faecal Sludge and Septage Management, GESI = Gender Equality and Social Inclusion, GRC = Grievance Redress Committee, IP= Indigenous peoples, MPR = Monthly Progress Report, PIU = Project Implementation Unit, PMU = Project Management Unit, QPR = Quarterly Progress Report.

Appendix 36: Summary of Public Consultations

S. No	Number of Person consulted	Male	Female	Issues Discussed	Outcome
1	22	9	13	Present water supply and sewerage condition, access to water supply, quality of water supply, project components and the benefits to the community, willingness to pay	The consultation/s was conducted specifically with the scheduled tribe community. Some households do have individual water supply connection. Entire community could not afford domestic water supply connections due to (i) lack of funds to get the connection installed (cost of pipes, construction of water storage facility (ii) some households have constructed houses on land parcels without having land titles and hence not willing to take connections, (iii) have easy access to public water supply source and are not willing take individual connections. Willing to take new connections if 24*7 water supply is available which is of good quality. If the individual investment is on the lower side, willing to pay on flat rate basis – possibly on affordable rate. Open defecation was/is practiced due to lack of individual toilets. Many have constructed toilets in the recent past availing subsidised schemes from the Municipality.
2	35	27	8	Present water supply and sewerage system of the town, project components, sewerage system, property connection, willingness to pay	Public in general were satisfied with the components identified and assured for required support. People are willing to pay for the improved quality of water.

S. No	Name of Persons	Location	Topic Discussed	Outcome	Photographs
1	Ms. Magli, Ms. Mamta, Ms. Puspa, Ms. Patki, Ms. Leela, Ms. Ugma, Ms. Jyoti, Ms. Sugna, Mr. Laxman, Mr. Gulab, Ms. Dariya, Ms. Manju, Ms. Hansa Devi, Mr. Paput, Mr. Raguha, Mr. Buta Ram, Mr. Naryan Lal, Mr. Lala Ram, Ms. Ramli, Ms. Panku, Mr. Lakha Ram, Mr. Amar Singh	Ward 3 Unseni village- Abu Road, Ward 2	1) Present water supply and sewerage condition 2) access to water supply 3) quality and quality of water supply, 4) project components under RSTDSP and the benefits to the community 5) benefits to women 6) willingness to pay 6) GRM of the project	Some households do have individual water supply connection. Entire community could not afford domestic water supply connections due to (i) lack of funds to get the connection installed (cost of pipes, construction of water storage facility (ii) some households have constructed houses on land parcels without having land titles and hence not willing to take connections, (iii) have easy access to public water supply source and are not willing take individual connections. Women excited about the prospect of getting individual water connections. They opined that their energy, time and hard labour will be saved especially during summer months. Enquired if their area has been included under the project. The project team appraised that the entire town including their area in Ward 2 and 3 will be covered under proposed water supply network. Willing to take new connections if 24*7 water supply is available which is of good quality. If the individual investment is on the lower

Appendix 38: Cut off date Photographs

Appendix 39: Safeguard Training program for PIU,CMSC and Contractor

Orientation program with Project Contractor, CMSC Engineer, Safeguard team of CMSC and Social Outreach team of contractor was held in the PIU office and requirement of Safeguard issues during project implementation was deliberated in details.(i) Introduction to SPS 2009(ii) Introduction to Agreed Resettlement Framework(iii) Type of Impact envisaged and Mitigation Measures (iv) Resettlement Plan and its components (v)Contractor's role in minimization of involuntary resettlement during finalization of design and during execution (vi) Requirement of updating Resettlement plans (RP) by CMSC and requirement of contractor to intimate about final scope/alignment/change of scope and mitigation plan for congested areas including liaison with concerned department(vii) Requirement of 100% Socio Economic Survey as per finalized alignment / scope(viii) Grievance Redress Mechanism/Grievance Redress Committee /City Level Committee(ix) Requirement of Coordination between the agencies involved in execution works.

It was deliberated that RP implementation is contractual obligation. It is the responsibility of CMSC to update draft RP after incorporating final impacts and budget. Contractor will facilitate Social Safeguard Person of CMSC for conducting detailed socio economic survey. Being a Design Build Operate contract, the final design/alignment will be provided/ re-confirmed by the contractor. It was also informed that (i) The work should be executed in planned/ phased manner so that temporary inconvenience is avoided (ii) Assess to the households to be maintained during laying of pipeline. (iii) Access to CPRs to be maintained. (iv) Natural Drains should not be disturbed (as far as possible) (v) Advance intimation need to be provided to the household prior to start of pipe laying works. List of participant is attached.

PIU- Abu Road, Sirohi, Ratangarh,
Fatehpur, Laxmangarh, Sardarsahar,
Kuchaman, Ladnu, Makrana, Didwana,
Khetri, Mandawa, Pratapgarh and
Banswara.

Subject:- Nomination of Safeguard and Safety Officer (SSO) of each PIUs for proper monitoring of Environmental and Resettlement issues and addressing of safeguard related Grievances through Grievance Redress Mechanism.

Reference:- Agreed Environmental Resettlement framework and EARF of RSTDSP.

All PIUs are directed to issue an office order to nominate one engineer from PIU to works as Safeguard and Safety Officer (SSO). It will be additional responsibility of Safeguard and Safety Officer (SSO), PIU to ensure day to day monitoring of implementation of Environmental Management and Monitoring Plan (EMMP) provisions, implementation & Monitoring Resettlement Plan (RP) and ADB Safeguard Policy& Safety compliance in concern town.

Further it is directed that all the PIU should maintain proper separate records of safeguard related Grievances received in their town and ensure that the safeguard related Grievances received are resolved as per Grievance Redress Mechanism (GRM) prescribed in EARF/RF which is summarized as under (for ready reference)

Methodology of multi-tier GRM	Responsibility/Action to be taken	Time Frame	Record Keeping
1st level: Grievances that are immediate and urgent in the perception of the complainant, the contractor, and supervision personnel from PIU and CMSC on-site will provide the most easily accessible or first level of contact for quick resolution of grievances	EE PIU will resolve issues in consultation with supervision personnel (ACM), Safeguard and Safety Officer (SSO) PIU, Contractor, and Safeguard staff of CMSC. If required, city level monitoring committee (CLMC) will be involved in resolution of grievances at the 1st level;	PIU will resolve issues within 7 days of receipt of a complaint/ grievance.	Safeguard Support of CMSC will oversee the matters and prioritize / follow up the issues with PIU/Contractor. Safeguard and Safety Officer of PIUs, Safeguard Support of CMSC will record Grievances timely in the format enclosed as Annexure 1. Contractor/ Safeguard Support of CMSC will enter the general Grievance received (in a summarized manner) in Grievance Register (format enclosed as Annexure 2) on receipt form public forwarded to head of PIU or Safeguard and Safety Officer (SSO) for resolve in time and provide summarized information as and when require.

The grievance register will be endorsed by all field agencies involved in implementation of EMP and

Methodology of multi-tier GRM	Responsibility/Action to be taken	Time Frame	Record Keeping
2nd level: All grievances that cannot be redressed within 7 days at field/PIU level will be brought to the notice of Zonal PIU headed by Additional Chief Engineer (ACE).	The ACE at zonal PIU will resolve issues in consultation with SE/EE PIU, assistant safeguard officer (ASO), field level PIU, CMSC, and the contractor.	The ACE at zonal PIU will resolve the grievance within 7 days of receipt of complaint/grievance.	RP. Environmental and Social Safeguards Personal of CMSC will keep all the records referred to zonal PIU and after compilation, all the details will be submitted to PMU.
3rd level: All the grievances that are not addressed by Zonal PIU within 7 days of receipt will be brought to the notice of the PMU.	Project Officer (Social/Environment) at PMU will resolve the grievance with necessary co-ordination of Zonal PIU and CMSC and guidance/instruction of additional project director (APD-PMU).	PMU will resolve the grievance within 15 days of receipt of grievance.	Safeguard Support of PMCBC will keep all the records referred to PMU.
4th level: Grievances not redressed through this process within/at the project level within stipulated time period will be referred to the CLC/grievance redress committee (GRC).	Zonal PIU will inform the CLC regarding any grievances required to be resolved urgently.	The GRC will resolve the grievance within 15 days of receiving the complaint.	Environmental and Social Safeguards Personal of CMSC will keep all the records.
Please note that an aggrieved person shall have access to the country's legal system at any stage, and accessing the country's legal system can run parallel to accessing the GRM and is not dependent on the negative outcome of the GRM.			

PIU Safeguard and Safety Officer (SSO) will monitor the entire process and all decisions taken by the PIU, zonal officers, PMU and GRC and will be communicated to the APs by Safeguard Support of CMSC.

It is also directed that names and contact number of the concerned Safeguard and Safety Officer (SSO) of PIU, contractors, safeguard support staff of CMSC will be posted at all construction sites at visible locations.

All PIUs will ensure timely issuance of order with a copy to Project Officer (Social & Environment), PMU. Further PIUs will be responsible to ensure redressal of grievances as per GRM procedures summarized above.

Appendix 42: Sample Monitoring Template

A semi-annual monitoring report shall be prepared on Resettlement Plan implementation and submitted to ADB by the PMC. It will include: (1) **the list of affected persons**, with compensation, if any due to each and details of compensation paid with signed receipts annexed to the report, socio-economic status and satisfaction levels of affected persons with the Resettlement Plan implementation process, compensation and mitigation measures; (2) **the list of vulnerable affected persons** and additional compensation / special protection measures planned/implemented for them (e.g. assistance to obtain project construction related jobs); socio-economic status and satisfaction levels of affected persons with the Resettlement Plan implementation process, compensation and mitigation measures; (3) **list of roads for closure** and actions planned / taken to minimize disturbance; (4) **details of consultations held with affected persons** (with number of participants by gender, issues raised, conclusion / agreement reached, actions required/taken; (5) **details of grievances** registered, redressed, outstanding complaints, minutes of GRM meetings held; (6) **details of information disclosure** and awareness generation activities, levels of awareness among target population and behavior change, if any; and (7) **any other relevant information** showing Resettlement Plan implementation progress. The following checklist may be used for overall monitoring of Resettlement Plan implementation.

S. N.	Resettlement Plan Activities	Completed Y/N	Remarks
A. Pre-Construction Activities and Resettlement Plan Activities			
1	Approval of final Resettlement Plan by ADB prior to contract award		
2	Disclosure of final Resettlement Plan on ADB and EA websites		
3	Circulation of summary Resettlement Plan in local languages to all stakeholders		
Resettlement Plan Implementation			
1	Grievance Redress Mechanism established at different levels		
2	Entitlements and grievance redress procedure disclosed		
3	Finalization of list of affected persons, vulnerable affected persons and compensation due		
4	Finalization of list of roads for full or partial closure; mitigation measures proposed and implemented (with photographic documentation)		
5	Affected persons received entitlements as per EM in RP		
6	Payment of compensation, allowances and assistance (No. of affected persons)		
7	Additional assistance (project-related construction jobs, if willing and able) for vulnerable households given (No. of vulnerable affected persons assisted)		
8	Grievances No. of grievances registered No. of grievances redressed Outstanding complaints Disclosure of grievance redress statistics		
9	Consultation, participation and disclosure as per Plan		
C. Monitoring			
10	Survey on satisfaction levels of affected persons with Resettlement Plan implementation completed		
D. Labor			
11	Implementation of all statutory provisions on labor like health, safety, welfare, sanitation, and working conditions by Contractors. Ensuring no		

S. N.	Resettlement Plan Activities	Completed Y/N	Remarks
	child labour used		
12	Equal pay for equal work for men and women		

NOTE: Where applicable, the information provided in the table should be supported by detailed explanatory report, receipts and other details.

Annexure 44: Status of recommendation suggested in Draft RIPP

S. No	Measures Recommended in The Previous Document	Status as On Date
1	This RIPP will be updated with road wise detailed measurement and census surveys where pipelines will be laid during detailed design and before start of civil works by the CMSC social safeguard specialist. The updated/revised resettlement and indigenous peoples plan will be submitted to the ADB for approval. A 100% census and socio-economic surveys will be undertaken to register and document the status of affected people within subproject impact areas. Detailed measurement survey will be jointly conducted by safeguard specialist of consultants and contractors prior to implementation at each site/stretch of alignment.	Joint site visit in each stretches has been undertaken by PIU/CMSC/Contractors engineers and tentative alignment was provided by the DBO contractor.As per contract, contractor should have to carry out the execution activities in all respects for that particular zones/DMA's and after completing the particular DMA/Zones, contractor shall focus for remaining zones/DMA's on priority basis.As it was mandatory to update RIPP before start of civil works and anticipating the possibility of changed alignment after trial pit, 100% socio economic survey has been done for all the vendors/hawkers in both side of the road where water supply and sewerage networks pipeline to be laid.
2	During finalization of detailed design, and prior to commencement of civil work in the CWR sites, sites for CCC and MCC; PMU/PIU will reassess if there is any involuntary resettlement impact to persons and or indigenous peoples (or any other stakeholder) due to this subproject component and update this draft plan accordingly in compliance with ADB SPS, 2009 requirements and the agreed resettlement framework/IPPF for the project.	During detailed measurement survey, location of WTP, CWR at Housing Board, Gandhi nagar and CRMC building was changed as per technical requirement. Due diligence was undertaken by PMCBC/CMSC safeguard expert, no IR issues envisaged in all the changed location as vacant unused government lands are available for all the said works. This RIPP is revised to indicate the latest components of the project.
3	During RIPP updating, census/socio-economic surveys for temporary impacts should include specific questions on place of business, its seasonal variation and affected persons migrant nature. A separate list of such affected persons should be made available in the updated resettlement plan	During census/socio-economic surveys of potentials APs, all the details like type of occupations, seasonal variation, business hours etc has been taken for prepare benchmark for monitoring and evaluation
4	Cut-off-date for temporary impacts will be communicated to APs before the start of survey (and not in much advance) and also by putting up printed information in project affected area at some common advertisement place and that to be added to the updated RIPP.	Cut-off-date for temporary impacts was communicated to all the potential APs and list of potentials APs was displayed road wise, included in this updated document.
5	Public consultations and engagement will be carried out through the entire project planning and implementation phase. Another round of consultations will specifically be carried out during detailed census survey (100 % affected persons survey) stage, upon finalization of design. Formal and informal consultative methods will be carried out including, but not limited to: focus group	Goals and objectives of the project have been disclosed to stakeholders (including beneficiaries, affected persons, scheduled tribe community, elected representatives and institutional stakeholders) during updating of draft RP attached in this document.

	discussions (FGDs), public meetings, community discussions, and in-depth and key informant interviews; An intensive information dissemination campaign for affected persons will be conducted and details will be appended in the updated resettlement plan.

सिटी लेवल कमेटी मिटिंग दिनांक 25.08.2017 सिरोही आर.यू.आई.डी.पी. फेस चतुर्थ की बैठक कार्यवाही विवरण	
आर.यू.आई.डी.पी. चतुर्थ चरण के अन्तर्गत जलप्रदाय एवं सीवरज योजना पर विस्तृत चर्चा हेतु जिला कलेक्टर, सिरोही की अध्यक्षता में दिनांक 25.08.2017 को सिटी लेवल कमेटी की बैठक आयोजित की गई। सलाहकार फर्म द्वारा प्रजेन्टेशन के माध्यम से योजना के अन्तर्गत किए जाने वाले कार्यों की विस्तृत जानकारी दी गई। नगर पालिका, आइरॉड एवं सिरोही द्वारा नियुक्त सलाहकार फर्म के द्वारा जलप्रदाय एवं सीवरज योजना की विस्तृत परियोजना रिपोर्ट बनवाई जा रही है। आर.यू.आई.डी.पी. द्वारा इन विस्तृत परियोजना रिपोर्ट की समीक्षा की जायेगी। बैठक में उपस्थित जनप्रतिनिधियों एवं अधिकारियों की सूची अनुसूचद-अ पर संलग्न है। सलाहकार द्वारा निम्नलिखित प्रस्तावित जलप्रदाय व सीवरज योजना के कार्यों पर प्रस्तुतिकरण दिया गया:-	
आवृत्ति	
(अ) जल प्रदाय कार्य :- शहरी क्षेत्र में पानी की छीजत (NRW-Non Revenue Water) को कम करने को साथ उचित दबाव के साथ निर्बाध जल वितरण करने का प्रावधान रखा गया है। इस जल वितरण प्रणाली के अन्तर्गत निम्नलिखित कार्य प्रस्तावित किये गये हैं :-	
• वाटर ट्रीटमेन्ट प्लांट - 10 एम.एल.डी. (Near Santpur) • ट्रांसमिशन मेन - डीआई को-8 (100 एम.एम से 450 एम.एम व्यास) की पाईप लाईन - 53 किमी • सीडब्ल्यूआर - 6.2 एम.एल. • डिस्ट्रीब्यूशन मेन - एच.डी.पी.ई. (75 एम.एम से 355 एम.एम व्यास) की पाईप लाईन - 127 किमी • हाउस सर्विस कनेक्शन - 15500 कनेक्शन	
(ब) सीवरज कार्य :- इस परियोजना के अन्तर्गत निम्नलिखित निर्माण कार्य प्रस्तावित किये गये हैं :-	
• एच.डी.पी.ई. - (200 एम.एम से 315 एम.एम व्यास) की पाईप लाईन - 103.5 किमी • आर.सी.सी एन.पी-4 - (400 एम.एम से 500 एम.एम व्यास) की पाईप लाईन - 2.1 किमी • एच.डी.पी.ई. (Trenchless) - (200 एम.एम से 700 एम.एम व्यास) की पाईप लाईन - 5.2 किमी • सीवरज ट्रीटमेन्ट प्लांट (एसबीआर टेक्नोलॉजी) - 7.0 MLD (Near Santpur)	
2.0 MLD (Near Askhar Bhata)	
उपरोक्त कार्यों की विस्तृत परियोजना रिपोर्ट की अनुमानित लागत राशि रुपये 167 करोड़ है।	
सिरोही	
(अ) जल प्रदाय कार्य :- जिसके अन्तर्गत शहरी क्षेत्र में पानी की छीजत (NRW-Non Revenue Water) को कम करने के साथ उचित दबाव के साथ निर्बाध जल वितरण करने का प्रावधान रखा गया है। इस जल वितरण प्रणाली के अन्तर्गत निम्नलिखित कार्य प्रस्तावित किये गये हैं :-	

- वाटर ट्रीटमेंट प्लांट - 8 एम.एल.डी.
- ट्रांसमिशन मेन - डीआई के - 9 (100 एम.एम से 450 एम.एम व्यास) की पाईप लाईन - 27 किमी
- सी.डब्ल्यू.आर. - 5.0 एम.एल.
- डिस्ट्रीब्यूशन मेन - एच.डी.पी.ई. (75 एम.एम से 355 एम.एम व्यास) की पाईप लाईन - 95 किमी
- हाउस सर्विस कनेक्शन - 12000 कनेक्शन

(ब) सीवरज कार्य :- इस परियोजना के अन्तर्गत निम्नलिखित निर्माण कार्य प्रस्तावित किये गये हैं :-

- एच.डी.पी.ई. - (200 एम.एम से 315 एम.एम व्यास) की पाईप लाईन - 98 किमी
- आर.सी.सी एन.पी-4 - (350 एम.एम से 500 एम.एम व्यास) की पाईप लाईन - 2.6 किमी
- एच.डी.पी.ई. (Trenchless) - (200 एम.एम से 450 एम.एम व्यास) की पाईप लाईन - 8.6 किमी
- सीवरज ट्रीटमेंट प्लांट (एमबीआर टेक्नोलॉजी) - 4.0 MLD (Near Nehru Nagar)

1.5 MLD (On Revdar road)

उपरोक्त कार्यों की विस्तृत परियोजना रिपोर्ट की अनुमानित लागत राशि रुपये 129 करोड़ है।

बैठक में निम्न बिन्दुओं पर चर्चा की गई एवं निर्णय लिया गया -

1. घेयरमेन, नगर पालिका द्वारा आबूरोड शहर के समीप 6 गांवों की भी मांग को इस परियोजना में सम्मिलित करने की मांग की गई। चूंकि शहर के समीप मैसासिंह बांध के जलावा अन्य कोई स्रोत उपलब्ध नहीं है तथा यह 6 गांव शहर के समीप स्थित है अतः समिति द्वारा बैठक में चर्चा के दौरान इस मुद्दे पर विचारविमर्श कर इन 6 गांवों को जो कि इस परियोजना में सम्मिलित करने का निर्णय किया गया। इस हेतु पीने योग्य पानी को स्वच्छ जलाशय के आउट लैंट पर उपलब्ध करवाया जावेगा एवं गांवों को पेयजल उपलब्ध करवाने के समस्त कार्य जन.स्वा.अभि. विभाग द्वारा करवाए जायेंगे क्योंकि आरयूआईडीपी द्वारा शहरी क्षेत्र के लिए ही कार्य किए जाने का प्रावधान है।
2. परियोजना के अन्तर्गत अण्गीर बांध से 95 MCFT पानी का प्रावधान रखा गया है, लेकिन सिरोही शहर की जलापूर्ति हेतु जल संसाधन विभाग द्वारा विगत वर्षों में औसतन 65 MCFT पानी ही अण्गीर बांध से जलदाय विभाग को दिया जाता है। अण्गीर बांध में विगत कुछ वर्षों में पानी की आवक कम होने के कारण वर्ष 2014-15 में मात्र 65 MCFT पानी ही उपलब्ध हो पाया था अतः अण्गीर बांध से 95 MCFT पानी का प्रावधान उचित नहीं होगा। बैठक में विचारविमर्श कर उपरोक्त परिस्थिति के मद्देनजर शहर के समीप कालका बांध को भी स्रोत के रूप में उपयोग किये जाने हेतु निर्णय लिया गया है। जिसमें 53 MCFT जल उपलब्धता बताई गई। अतः शेष पानी 53 MCFT कालका बांध से लेकर प्रस्तावों में संशोधन किया जावे।
3. आबूरोड/सिरोही शहर की जलापूर्ति/सीवरज योजना में प्रस्तावित वाटर ट्रीटमेंट प्लांट, सीवरज ट्रीटमेंट प्लांट एवं स्वच्छ जलाशय हेतु जमीन नगरपरिषद/नगरपालिका के द्वारा सम्बन्धित विभाग को प्रस्तावों की रचीकृति से पूर्व उपलब्ध करवाई जावेगी एवं सम्बन्धित नक्शे खसरा संख्या एवं क्षेत्रफल दर्शाते हुए उपलब्ध करवाए जायेंगे।

4. परियोजना के अन्तर्गत जलापूर्ति योजना हेतु SCADA system काम में लिया जावेगा एवं पम्पिंग स्टेशन पर डी.जी. सैट का प्रावधान लिया जावेगा।
5. सीवरज योजना हेतु S.T.P. पर SCADA system काम में लिया जावेगा एवं मैनहोल पर आवश्यकता अनुसार सेन्सर लगाए जावेंगे। सीवरज योजना में सीवरज ट्रीटमेन्ट प्लांट में शोधित सीवरज के पूर्ण उपयोग का प्रावधान लिया गया है।
6. पुराने उच्च जल्लाशय जो काम में आ सकते हैं उनको काम में लेत हुए अन्य क्षेत्रों में बी.एफ.डी. पम्पों के द्वारा जल वितरण प्रस्तावित किया गया है। इस योजना के अन्तर्गत शहर के सभी House service connection के साथ वाटर मीटर लगाने का भी प्रावधान किया गया है। अवैध जल सम्बन्धों को नियमित किया जावेगा।
7. 3.5 मीटर से अधिक गहरी सीवर लाईनों को ट्रेंचलेस द्वारा डाला जायेगा जिससे शहरवासियों को असुविधाओं का सामना न करना पड़े। 4.0 मीटर चौड़ाई तक सभी सड़कों का पूर्ण चौड़ाई में रोड रेस्टोरेशन किया जावेगा।
8. सभी कार्यों का संचालन एवं संधारण कॉन्टेक्टर फर्म द्वारा 10 वर्ष तक किया जायेगा। जिसमें पानी तथा सीवरज लाईनों का भी रखरखाव शामिल है।
